Marin,M: 'Marin,Mihail: 'Colovic, Aleksandar: 'English Opening The Black defences are very difficult to breach in modern chess, so when playing with White the players always try to find new ways to pose problems. We have already mentioned Svidler's change of repertoire with Black, while with White, instead of his usual 1.e4, he chose the English Opening ("the opening of the future") in all his games (except the one against Topalov in Round 2, which saw a dull Berlin draw). The English in various versions was very popular in Moscow with 14 games played. The reason is that it is (still) less explored than the other openings after 1.d4 and 1. e4 and it is less forcing in nature, allowing for more creative play.'" **1.c4** Marin,M Marin,M Marin,M: 'Marin,Mihail Marin,Mihail Marin,Mihail'

7.d3 h6 Black naturally wants to prevent 8 Bg5, now that he has blocked his own dark-squared bishop's retreat with 6...d6
8.Na4!? White targets Black's bishop, aiming to gain time by pushing it back with a2-a3/b2-b4 or e2-e3/d3-d4 etc. This is quite a rare move which amazingly was played in two concurrent games in this same round of the Candidates! Aronian-Topalov was the other game which diverged at move 9 (see below). Sagar,Shah/CB Website: 'Of course, the idea of this move is to catch the bishop on b4.'

11.e3 Alternatives:

[11.h3 is worth considering]

[11.Nh4 can be answered by Bd7 12.a3 Bc5 13.Nxc5 dxc5 with rough equality, as White's knight is far from the central light squares.]

[11.a3 Bc5 and now the typical tactic 12.Nxe5 Nxe5 13.d4 Ba7 14.dxe5 dxe5 doesn't get White anywhere since his b3-pawn is weak]

11...Qe7 Its not clear why Black shouldn't play Sagar,Shah/CB Website: 'The main reason why the queen is not so well placed on e7 is because from d7 it can prepare the bishop going to h3, and also the e7 square can be kept free for the knight on c6.'

(team-ch) Russia 2016
[Najer,Evgeniy]

Intro to Russian Team Championship by GM Evgeny Nager About 8-10 years ago the Russian Team Championship was the most exciting competition in the country's chess calendar. A legion of stars, Ivanchuk, Gelfand, Aronian, Mamedyarov, together with all the best Russian grandmasters, apart from Kramnik, took part year after year in this grand event. However, after the economic crisis in 2008, the tournament dropped dramatically in both status and strength. This year the Premier League began with only five teams, who played a double round-robin. Previously, one of the main incentives for the players was qualifying for the European Club Cup. However, this time, even before the clocks were started, it was clear that all the participating teams would qualify automatically as they were so strong. Oddly enough, the quality of the players in the tournament has not changed much over the years. True, now there were almost no foreign grandmasters, with the exception of Dominguez and Bu Xiangzhi in "The Bronze Horseman", but out of Russia's 14 best players, 13 came to play in Sochi! Where else in Russia can you see Vladimir Kramnik sitting at the chessboard? Only in Sochi, where he was playing for the Siberia team for the second consecutive year - and brilliantly. He scored 4 out of 5 this time, including a victory over Svidler and two wins against Sjugirov. He missed an "open goal" against Karjakin and only at the second attempt was Svidler able to take a draw off him in more or less convincing fashion. As a result, Vladimir returned to second place in the world Elo ranking list. I might add that in the European Club competition, Kramnik played even better for the Siberia team! One gets the impression that if club competitions were held not just twice, but five or six times a year, Vladimir would find himself very quickly in close pursuit of Magnus. In spite of having such a team leader and the most powerful line up of players, Siberia's overall performance was not a success, as they only finished third. The reason for this was the bad form of a number of players who have not had any recent playing practice. In particular, Dmitry Yakovenko will probably want to forget the tournament as soon as possible. By the way, in the basic team line-up, Dmitry was the only true Siberian, as he was born in Nizhnevartovsk. Grischuk also struggled. Moreover the Siberia team, in contrast to that of Moscow and St. Petersburg, lacked adequate substitutes and so it was quite easy to prepare against them. It was quite a different mood in the Moscow team, which eventually took silver. True, Sergey Karjakin had not yet got over his Candidates' triumph, especially from the emotional point of view, and his score of 1 out of 3 is certainly not a result expected of a world title challenger. In fact it could have been even worse for Sergey had he not been the beneficiary of a good deal of luck. But the remaining Muscovites were in great shape - in fact some were in simply fantastic form, such as our second and third boards, Nepomniachtchi and Inarkiev. Ernesto

had a 2900 performance, defeating Dominguez, Yakovenko and Artemyev. Only a day after the end of the team competition, he went on a punitive expedition to the European Individual Championship, where he fully deserved to win the title. If, before the tournament, someone had predicted that Moscow would finish in second place, there would probably have not been much disagreement. But at the end, bearing in mind our two brilliant victories over Siberia with a total score of +5, I felt disappointed with our silver medal. Unfortunately, the loss in our second match against Petersburg and a draw at the start of the tournament against Zhiguli, did not allow us to reach the top. Of course, first place for the "Bronze Horseman" was no big surprise. It is a strong team, which has fielded virtually the same line-up of players for many years. The St Petersburg team is characterized by healthy conservatism. When one of their local young players merited selection for the team due to his strength and Elo rating, it was bound to happen sooner or later. But never before was the timing so right as this year, and the Petersburg line-up was expanded with the inclusion of 20-year-old Vladimir Fedoseyev. A player of the future? No way - Fedoseyev's rating is already 2685. Yet, even in this case, Petersburg relied mostly on their experienced fighters, sending the young grandmaster into battle only three times. Fedoseyev won all three of these encounters, including a crucial last rounder against Kazan, where "The Bronze Horseman" won by the closest possible margin. In my opinion, Petersburg won the tournament thanks to their strength in depth, since none of their players failed. Initially, things didn't quite work out for Svidler, scoring just ½ out of 3 at the start of the tournament, but then he finally got his act together and won an important game against Karjakin in the match versus Moscow. The best play was produced by the "midfielders" on boards 3-5: Vitiugov, Bu Xiangzhi and Matlakov, who each won a series of games in very close yet decisive matches and without losing even once. In general, it was a hard-earned victory rather than a brilliant one for the team from St. Petersburg. **1.c4** Paunovic,Tomislav **1...e6 2.Nc3 d5 3.d4 Nf6 4.cxd5 Nxd5 5.Nf3** Peter refuses to occupy the centre of the board in classical fashion and switches to a Catalan structure instead.

A fundamental and apparently strategically forced move. Paunovic, Tomislav: 'N!' **16.Qb2**

[The computer insists on an advantage for White after 16.a6 Ba8 17.Rfd1 but, humanly, it is obvious that if Black wants to draw then he will have to put in a good deal of serious effort to achieve it. An illustrative variation is Nxe5 *(17...Qd6!?* Paunovic,Tomislav*)* 18.dxe5 Bxg2 19.Qxd8 Rfxd8 20.Kxg2 g6 *(20...g5=* Paunovic, Tomislav *)* 21.Rac1 Rxc1 22.Rxd8+ Kg7 23.Rd7 Ra1 24.Rxa7 b4 and, in spite of having an extra pawn, White's chances for a win are purely theoretical.]

17.Nd3 Though consistent, this is an extremely risky idea. White wants to prove his knight's superiority over the opponent's bishop and precisely for this purpose he forces the black pawn structure on to light squares. The problem is that he has to part with his bishop, which, of course, greatly weakens the position of the white king. Paunovic,Tomislav: '?!'

[17.Rfd1 Ba8 18.Nxc6 Bxc6 19.e4 Qd6 would have led to a roughly equal position. Paunovic,Tomislav: '=']

[Here Kramnik could have gone for some beautiful tactics: 17...Nxd4 Paunovic,Tomislav: '!?' 18.Bxb7 Rc2 19.Qa3 Rc3! and White is unable to avoid the repetition after 20.Qb2 *(20.Qa2* Paunovic,Tomislav *Rc2=)* 20...Rc2]

Although, judging from the course of the game, Vladimir had little cause to regret this lost opportunity. **18.Bxc6** The following sequence of moves is more or less forced. **18...Rxc6 19.Nb4 Rc4**

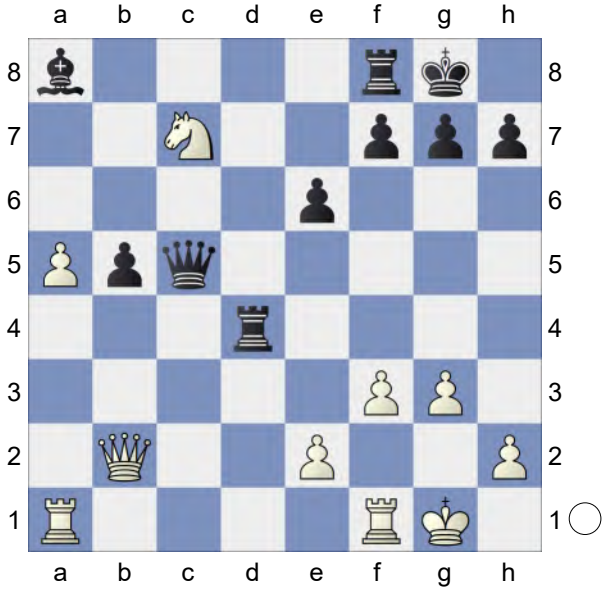
[A more cautious continuation would have been 22.Rab1 Rd2 23.Qxb5]

22...Qc5 Perhaps this was the key moment in the game. Diagram



23.Kh1 It is very difficult to predict where the white king would be safer. As the further course of the game shows, it was important to control the f2-square.

[23.Kg2! and play similar to the game doesn't promise anything good for Black.

A) Stronger is 23...Rc4 24.Nxa8 Paunovic,Tomislav Rxa8 *(24...Rc2?! 25.Rfc1! Rxb2 26.Rxc5 Rxa8 27.Kf2±)* 25.Rfc1=;

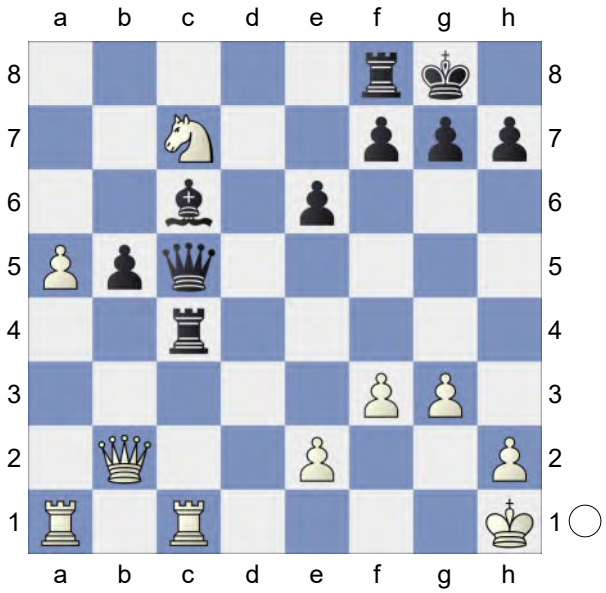
[If White wanted to bring his knight back, then it was necessary to control the f2-square, at least with a rook. Also possible was 24.Rac1 Rc4 25.Na6]

24...Rc4 Diagram



25.Na6? Paunovic,Tomislav: 'Diagram

Paunovic,Tomislav: '-+!' **27.Nc7**

As is well known, tenacity in defending difficult positions is not the strong point of Peter Svidler's play. Sometimes there is the feeling that he deliberately refuses to play on in losing positions for hours on end, and prefers to save his strength and emotional stability for the next battle.

Paunovic,Tomislav: '?'

[There were some practical chances to save the day only by 27.Rf1! Qa7 28.e4 Bxe4 29.Nc7! *(29.fxe4* Paunovic,Tomislav *Qxa6)*]

[27...Rxc1+! Paunovic,Tomislav 28.Rxc1 Bc4 Δ ♗e2]

28.Qd6 Rxc7 29.Qxc7 Qxe2 30.Ra3

And here, without waiting for the obvious 30... b4, Svidler resigned. Vladimir Kramnik played a great game, but the main cause of White's defeat was that Svidler tried too hard to squeeze more out of his position than could possibly be expected. So Siberia won their first decisive match confidently by 4 : 2 - Rublevsky also defeated Rodshtein. Who at that time could have predicted that they would lose their next two important matches? You can bet they will be especially dangerous in the European Club Cup this autumn!

[David Cummings]

1.c4 Abramovic,Bosko **1...g6 2.Nc3 c5 3.g3 Bg7 4.Bg2 Nc6 5.e3 e5**
Black signifies his intention to go for a fighting game. Instead the symmetrical line:
[5...e6 6.Nge2 Nge7 has a very drawish reputation (see Guo-Yuan and earlier games in the Archives), so it would be interesting to see what Nakamura had in mind there.]
6.Nge2 Nge7 7.0-0 0-0 8.Nd5
An earlier Nakamura game continued:
[8.a3 Abramovic,Bosko: '- 46/(64)' a5 9.d3 d6 10.Rb1 Rb8 11.Nd5 Nxd5?! *(11...b5!* is fine for Black) 12.cxd5 Ne7 13.b4 cxb4 14.axb4 b5 15.bxa5 Qxa5 16.Bd2 b4 17.Qb3 Bg4 18.Nc1 Rb6 19.Na2 Be2 20.Rfc1 Bxd3 21.Qxd3 Qxa2 22.Rxb4 with an extra pawn for White, Nakamura,H (2779)-Dominguez Perez, L (2739) Doha (blitz) 2016 1-0 (57)]
8...d6 9.Nec3
[9.a3 a5 10.Nec3 Be6 11.Rb1 Rb8 12.d3 Qd7 13.Re1 Bh3 was played in Sanduleac,V (2435)-Doncea,V (2460) Creon 2009 1/2-1/2 (23), and now there is an interesting idea that I don't recall seeing before. White can play: 14.Nb6! Qe6 15.Bd5 Qf5 16.f3 and Black's queen (and bishop) are almost trapped. After Qh5 17.Ne4 Rbd8 18.Bd2 White is much better.]
9...Bf5 A new move, aiming to pursue the bishop trade with 10...Qd7 and 11...Bh3. Black normally plays the conventional:

[9...Rb8 for example 10.Rb1 Nxd5 11.Nxd5 Be6 12.b3 Ne7 13.Nxe7+ Qxe7 14.Bb2 Rfd8 15.Qe2 d5 with balanced chances, Kantsler,B (2507)-Markowski,T (2592) Ohrid 2001 0-1 (73)]

10.d3 Qd7 11.a3 Bh3 Abramovic, Bosko: '!?' **12.Rb1 Bxg2 13.Kxg2 Nxd5 14.cxd5** Abramovic,Bosko: 'N'

B) 15...Rac8 Black can diminish the effectiveness of the b2-b4 push, for example 16.Bd2 f5 17.b4 c4 and Black is fine Abramovic,Bosko: '=']

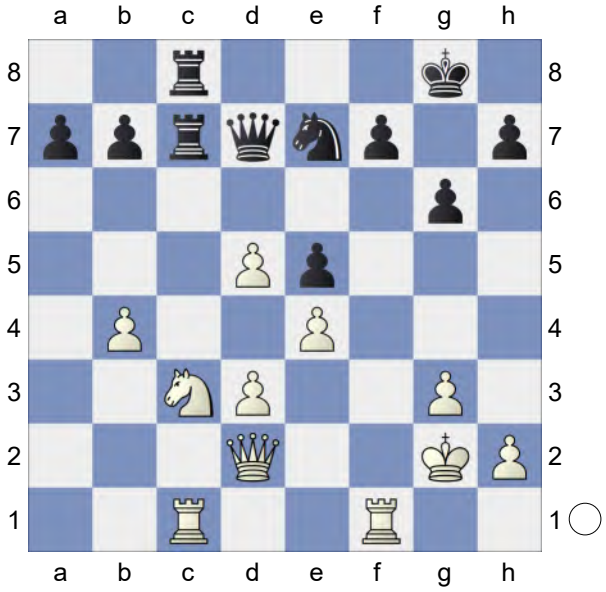
15...cxb4 16.axb4 Bh6?! Black was keen to trade his 'bad' bishop, but counter-intuitively, it seems that Black is better off keeping the bishops on. Instead:

[16...Rac8 17.Bd2 e4! opening up the bishop's scope, now it looks much better than its counterpart on the d2-square. 18.Nxe4 *(18.d4* can be met by *Qf5* hitting the d5-pawn*)* 18...Nxd5 19.Qb3 Nf6 when despite Black's extra pawn island, the chances are level here.]

17.e4 Bxc1 18.Rxc1 Rfc8 19.Qd2 Rc7 20.f4 Now the absence of the 'King's Indian' g7-bishop leaves Black's kingside, and central pawn chain, rather loose and open to attack. **20...Rac8 21.fxe5** Here the typical attacking thrust:

[21.f5 can be answered with gxf5 22.exf5 f6 23.Ne4 Nxd5 24.Qa2 Qf7 when 25.Qxd5 doesn't work because after Qxd5 the e4-knight is pinned!]

21...dxe5 Abramovic,Bosko: 'Diagram



' **22.Rc2** The d5-d6 thrust is in the air, but doesn't work yet:

[22.d6 Qxd6 23.Nb5 Rxc1 24.Nxd6 R1c2 and Black is at least OK 25.Qf2 Abramovic,Bosko Rxf2+ 26.Rxf2=]

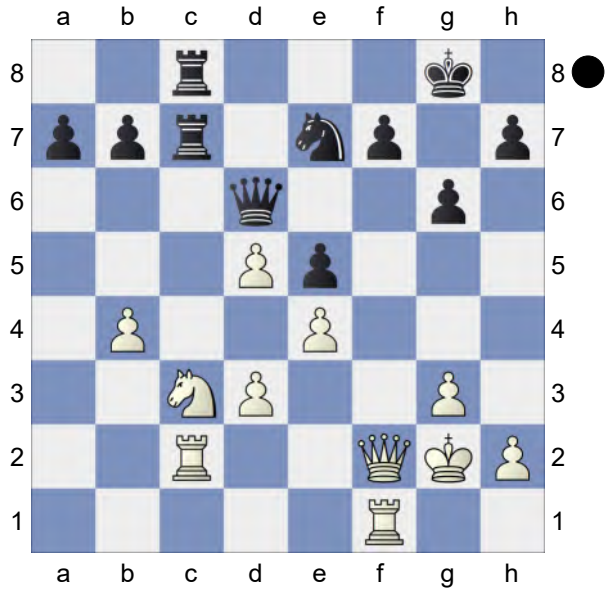
22...Qd6 23.Qf2? A big oversight. Instead Abramovic,Bosko: 'Diagram
[23.Rfc1 leaves White for choice. Note that Qxb4 doesn't work because of 24.Rb2 and now Qc5 25.d6 Qxd6 26.Nb5 picks up the exchange]



' **23...Nf5!** If it wasn't for this move, Black had no good way to defend the f7-pawn, but now the tables are suddenly turned in Black's favour. **24.exf5** Otherwise the pinned c3-knight is doomed anyway. **24...Rxc3 25.Rxc3 Rxc3 26.Qf3** White has a grim endgame also after:
[26.fxg6 Qxd5+ 27.Qf3 Qxf3+ 28.Kxf3 hxg6 29.Ke4 Kg7 *(29...Rb3∓ Abramovic,Bosko)* 30.Kxe5 Rxd3 etc.]

[⌓31.Qxe6 Abramovic,Bosko Rxe6 32.Re3 Kg7 33.Kg3 Kf6∓]
31...Kf8 32.Re3 Qh6+ A human approach, trading down to a clearly better rook endgame. Instead:
[32...Rd5 looks rather obscure but is given by the engine as decisive! Abramovic,Bosko: '!' 33.Qh5 Abramovic,Bosko Rd4-+]
33.Qxh6+ Rxh6+ 34.Kg3 Rb6 Black has good winning chances. **35.Re4 f6 36.h4?!** White is pushed into passivity after this, always a bad sign in rook endgames.

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Nxc6!? In my opinion this continuation is somewhat underestimated. **6...bxc6 7.e5 Qc7 8.Bf4!?** This way of protecting the pawn is new to our PGN Archive. However, this line occurred in Ian's practice before.

[8.f4 is the only move that was seen on our site so far The critical continuation here seems to be

A) 8...d6 9.Qf3 dxe5?! *(9...Bb7!?)* 10.fxe5 Qxe5+ 11.Be2 led Black into a dangerous position in Vallejo Pons,F (2666)-Andersson, U (2570) Germany 2004 [Fed];

[The most challenging reaction to White's next move seems to be 8...Rb8!?

A) Less attractive is 9.Bc4 Ne7 10.Qe2 Nd5 *(10...Rxb2!? 11.Bb3 Ng6 12.Bc1 Rxb3 13.axb3 Nxe5⇄)* 11.Bd2 Be7 12.0-0 0-0 13.b3 d6= Castrillon Gomez,M - Patino Garcia,C Baku AZE 2016;

9.g4 Accordingly to his style, Ian chooses the most aggressive way of handling the position.

[However, the modest 9.Be2!? isn't without merit too. For instance, Rb8 10.Rb1 Ne7 11.0-0 Rb4 12.Qd2 c5 was played in Kasimdzhanov,R - Bruzon Batista, L Turin 2006 Now White should have played: 13.Be3! Qxe5 14.a3 Rb6 15.Rfe1 , obtaining a dangerous initiative for a pawn.]

10...Nxf5 11.Bd3 Be7? This unsuccessful innovation is inviting serious trouble.

[The previously played 11...Rb8 should be met by 12.Bxf5 *(12.Qf3?! 12.Bxf5 exf5 13.Rg1 This is the point! It turns out that the Be7 is clearly misplaced now. **13...0-0**

[Hardly better is 13...g6 14.Qd4 Qa7 15.Qd2 Qc5 16.0-0-0 Rb8 17.b3 , and Black's position lacks any constructive ideas, whereas the Ke8 can be easily attacked.]

Prusikin,Michael: 'The Ruy Lopez Exchange Variation Typical Ideas For Black Generally, the exchange variation of the Ruy Lopez (Spanish) has the reputation of modest, but very solid option for White. He "sacrifices" the bishop pair in order to get a better pawn structure, and if everything goes well, a winning pawn endgame. However, in my opinion, Black has some more valuable trumps of his own. As long as there are some pieces on the board Black's pawn structure should not be any worse, while his bishops may prove to be real monsters in a long run. Now, let us take a closer look at some instructive examples which feature the clash of those strategic elements.'''The Ruy Lopez Exchange Variation Typical Ideas For Black Generally, the exchange variation of the Ruy Lopez (Spanish) has the reputation of modest, but very solid option for White. For example, if White still had a black-squared bishop instead of a white-squared one, a black bishop would quickly appear on f3 and Black would take the initiative. In this position, however, White has no big weaknesses, so Black would have to open the position with g6/h6/g5/f4 if he had ambitions. This operation, however, opens up lines which, as is well known, cannot be used so optimally by diagonal players. In this case, the superiority of white rooks over black rooks would become noticeable. Therefore, Black should rather keep quiet and wait to see if White does something crazy, like sacrificing on b5. White, on the other hand, can hardly open up the position in any meaningful way either, which means that the situation at hand should simply end

peacefully with risk neutrality on both sides. In solch geschlossenen Stellungen erweist sich das Material nicht immer als ganz so entscheidend, wichtiger ist oft das Potential der Figuren. Hätte Weiß beispielsweise noch einen schwarzfeldrigen Läufer, statt eines weißfeldrigen, würde schnellstens ein schwarzer Läufer auf f3 auftauchen und Schwarz würde die Initiative übernehmen. In dieser Stellung hat Weiß allerdings keine großartigen Schwächen, womit Schwarz mittels g6/h6/g5/f4 die Stellung öffnen müsste, falls er Ambitionen hätte. Durch diese Operation werden allerdings Linien geöffnet, die bekanntermaßen von Schrägschießern nicht so optimal genutzt werden können. In diesem Falle würde sich die Überzahl von weißen gegenüber schwarzen Türmen bemerkbar machen. Daher sollte Schwarz eher ruhig halten und abwarten, ob Weiß etwas verrücktes macht, wie z. B. auf b5 zu opfern. Weiß hingegen kann die Stellung auch kaum sinnvoll öffnen, womit die vorliegende Situation bei beiderseitiger Risikoneutralität schlichtweg friedlich enden sollte.' □ **Model Games**

■ **Svidler,Peter vs. Kramnik**

Our first game is between Peter Svidler & Vladimir Kramnik, two of the elite chess players at the time of the game. The first crucial point of this game comes at move 14. **1.d4 Nf6 2.c4 e6 3.Nf3 d5 4.Nc3 Bb4 5.cxd5 exd5 6.Bg5 Nbd7 7.e3 c5 8.Qc2 Qa5 9.Bd3 c4 10.Bf5 0-0 11.0-0 Re8 12.Nd2 g6 13.Bh3 Kg7 14.Rae1 Nb6** The deviation point from our files. Kramnik looks to exchange the light-squared bishops, without wasting time on stopping e4 . This is a strong move too and can be used as an alternative to our main line.

[14...Ne4 is what I recommend in the course. This gives us more chances to take over the initiative.]

15.Bxc8 White is forced to trade the light-squared bishops. **15...Raxc8**

[We get our last piece developed. We now want to play 15...-- Ne4 next, and after 16.Nde4 dxe4 , we want to play ...Bxc3 & ...Nd5 , establishing a

grip over the light squares in the position.]

16.Bxf6+ Not the most challenging. White hands over the bishop without putting up a fight. Svidler claims that the black king might be exposed, but as Kramnik shows, that's not the case.

[16.f3 preparing e4 , was the most challenging line. Bxc3 black should stop e4 . With ... Bxc3 , black also spoils white's queenside pawn structure. 17.bxc3 Na4! 18.Nb1 Re6 defending the f6 -knight. Black wants to play ... Rce8 / Rb6 next. 19.e4!? white's principled try. White looks to gain space on the queenside. dxe4 20.Bxf6+ forced, as black was threatening Qxg5 . Rxf6 21.fxe4 Rxf1+ 22.Rxf1 b5 with a tricky position on the board. White has a poor pawn structure but has more space in the center and is the better king. However, the knight on b1 is misplaced. The position is dynamically balanced, but I would very slightly prefer white since they are going to threaten our king.]

16...Kxf6 **17.f4** The principled idea. White wants to play f5 next, and look to open up the f-file. **17...Bxc3** In typical Manhattan fashion. Kramnik eliminates the c3 -knight and weakens White's queenside in the process. **18.bxc3** **Na4** Attacking the weakness. **19.f5** Svidler continues with his plan of opening up the kingside. **19...Kg7** Kramnik calmly avoids the potential discovery on the f-file and challenges White to show what they've got. **20.f6+** Svidler stays consistent with the strategy of trying to attack the kingside.

[A) 20.fxg6 hxg6 doesn't help white. Black keeps a slight edge due to the weaknesses on e3 & c3 .]

[B) 20.Nb1 is the computer's top choice. It's hard to believe that white is going to put any real pressure on us with moves like Nb1 .]

20...Kg8 White has closed down the f-file. There are no more attacking chances on the kingside. Kramnik now dominates the center & the queenside. **21.Nb1** **Re4** Kramnik stops e4 and improves his rook. He now wants to play ... Rce8 and increase the pressure over the e3 -pawn. **22.Rf3** Svidler tries to defend the e3 -pawn **22...Rce8** **23.Qf2**

[Svidler defends e3 and pretends that the queen might land on h6 . With this, he also threatens a cheapo Nxc3 23.Qd2 .]

23...b5 Kramnik ignores the kingside threats rightfully and just looks to improve his position on the queenside. His idea is to play ... b4 next and open up the path for the passed pawn on c4 . **24.Qd2** Svidler stops b4 . **24...Qb6** Kramnik retreats and prepares a5 - b4 . The rest of the game is irrelevant for us. It's clear that black has achieved total domination on the queenside and the center, and is gradually going to win by increasing the pressure over white's position. **25.h3** **h6** Preparing ... Kh7 , so that we don't have to keep the e4 -rook tied down to the defense of the h4 square (for Qh4 - h6). The rook might retreat to e6 , and increase pressure over the f6 -pawn. **26.a3** **Kh7** **27.Qf2** **a5** **28.Kh1** **Qd6** **29.Kg1** **R4e6** **30.Kh1** **b4** Achieving the goal of getting a passed c-pawn. **31.axb4** **axb4** **32.cxb4** **Qxb4** **33.Nd2** **Nb2** Followed by bringing all of the pieces to action. White is busted. **34.Rb1** **c3** **35.Nf1** **Qc4** **36.Qc2** **Nd3** **37.Kg1** **Ra8** Playing on

both flanks. **38.Rb7 Kg8 39.Nd2 cxd2 40.Qxd2 Ra1+ 41.Kh2 Qc8 42.Re7 Qb8+ 43.g3 Qb1** An excellent game, where black achieved all the strategic goals of our opening: dominating the center and attacking the queenside.

18...Qe2!?

[A super-refined move. The immediate 18...Qg4 looks more natural, but Black has good reasons to provoke the move Rde1. First of all (but not the most important), Black plans to play ... d5 and it could be useful to eliminate any possibility of pressure along the d-file. However, the essence is that the opposition of rooks along the e-file favours Black. In certain cases, the e3-bishop could remain pinned, while in others the exchange of rooks along the e-file would diminish

White's attacking chances on the kingside.]

19.Rde1 Qg4 20.Qh2

[20.Qxg4 hxg4 21.h5 looks tempting, but Black seems to have sufficient defensive resources. gxh5! *(21...Kg7 22.hxg6 Kxg6 23.Rh6+ Kg7 24.Reh1 Rh8 25.Rxh8 Rxh8 26.Rxh8 Kxh8* Apparently, everything is OK for Black, but the unexpected *27.Bxa7!?* (in the spirit of the first game of the Fischer-Spassky match) maintains better chances for White after *b6 28.a4!)* 22.Rxh5 Ng7! 20...d5 21.f3 Qa4 22.g4 Finally, White has managed to start a kingside attack which bears some similarity with the sharp lines of the Sicilian Dragon. It should be noticed that his own king finds himself in absolute safety, because of the absence of open files on the queenside. Finalmente, las blancas han conseguído lanzar un ataque en el flanco de rey que se parece a las agudas líneas de la variante del Dragon de la Siciliana. Cabe mencionar que su proprio rey se encuantra en absoluta seguridad, por la falta de líneas abiertas en el flanco de dama. **22...Bd6**

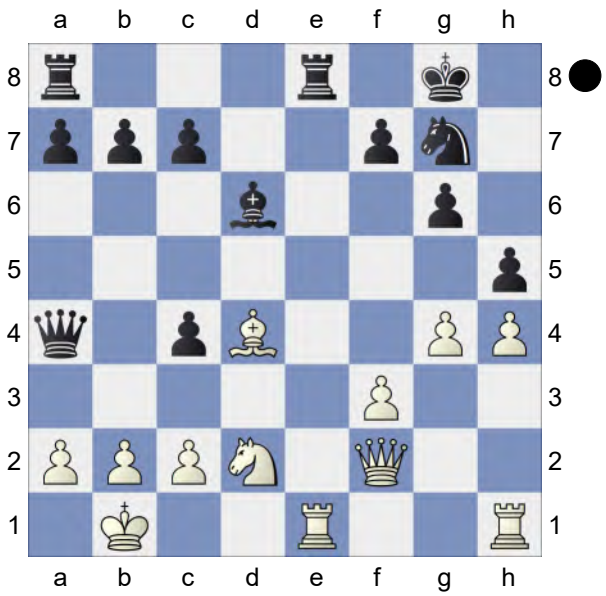
[22...hxg4? 23.h5!↑]

23.Qf2 Ng7 We can also notice some differences if compared to the Dragon, which favour Black. We have here an open file, which can always be used by the defending side for transposing to an ending by exchanging all rooks. This could happen if White tries to undermine Black's kingside fortress with Bd4, threatening Bxg7 and gxh5. Another aspect is Black's advantage of space in the centre (something unthinkable in the Dragon). Concretely, the presence of the d5-pawn restricts the activity of the white knight. También podemos observar ciertas diferencias con respecto al Dragon que favorecen a las negras. La presencía de una línea abierta ofrece a la parte en defensa simplificar la posición mediante el cambio de todas las torres. Por ejemplo. esto podía pasar en caso de Ad4, con idea de subminar la fortaleza negra del flanco de rey con Axg7 y gxh5. Otro aspecto se refiere a la ventaja de espacío en el centro de las negras, algo impensable en el Dragon. Concretamente, la presencía del peón de d5 en el centro restringe la actividad del caballo enemigo. **24.c4!?**

[24.Bd4 Rxe1+ 25.Rxe1 Re8= 26.Rg1 Be5!]

24...dxc4 25.Bd4 Svidler has cleared the e4-square for his knight, which can make a lot of difference after the aforementioned solution 25...Rxe1+ 26. Rxe1 Re8 because of 27.Ne4! However, the structural modifications in the centre have also opened the d-file and the h1-a8 diagonal, which will offer Black additional possibilities for defence and counterattack. Svidler eliberó la casilla de e4 para su caballo, lo que sería un factor esencial después de la parada mencionada anterirmente 25...Rxe1+ 26. Rxe1 Re8 por 27.Ne4! Sin embargo, las modificaciones structurales en el centro han dejado abiertas la columna de d y la gran diagonal blanca, lo que les ofrecerá posibilidades adicionales de defensa y contraataque a las negras.



25...Qc6! Indirectly defending the f6-square. Defendiendo la casilla de f6 de forma algo indirecta. **26.Bc3**

□ **Nepomniachtchi,Ian** **2720**
■ **Svidler,Peter** **2722**
RUS-ch 63rd Moscow (9) 20.12.2010
[Stohl,Igor]

Hard work in recent years has brought Nepomniachtchi from the "strong and promising GM" status to the top elite of current chess, right in line with his contemporaries (just like MVL, Karjakin and Carlsen, he was born in 1990). His first significant international breakthrough came in 2010, when he won both the European and Russian championships. Our game is from the latter tournament and was important for the final standings - multiple Russian champion Svidler was only 0.5 pts. behind the winners in the final standings. However, Nepo needed much more than that to prevail - only Karjakin's last round loss set the scene for a tiebreak. Sergey dominated the match, but didn't manage to win a single game, including the Armageddon decider... **1.e4 e5 2.Nf3 Nc6 3.d4** Ian also alternates with the Ruy Lopez and Italian, but the Scotch has remained a favourite throughout his career and he uses it more often than other top GMs. Indeed, only last year I wrote an opening article in CBM 200 about a currently fashionable Scotch line, centering around his recent game with Ding Liren (Legends of Chess online rpd 2020).

[However, in the 2010 European championship he scored heavily with 3.Bb5 a6 4.Ba4 Nf6 5.d3 Originally just a sideline, this system has meanwhile become very popular especially due to Carlsen's efforts, also the similarity to the Giuoco Piano and the Anti-Berlin lines with d3 plays a significant role:

[or 28.Re2 Bxb5 enables Black to build a tenable fortress. Nepo wants to increase the pressure and goes for a more concrete forcing line.]

28...Nxe8 29.Kb2 White's ♔ goes on the attack... **29...Kh6**

[So does Black's ♔, but 29...f5!? also deserves serious attention:

A) 30.Ka3 Kh6 31.Ka4 Kh5 32.Kxa5 Kxh4⇄ and Black's play is quite fast - already 33.Nxc7 Nxc7 34.Kb6 Ba8 35.Kxc7 Kg3 36.Kb8 Bc6 37.Kc7= with repetition is a reasonably circumspect choice.;

B) 30.Be2 Kf6 31.Ka3 g5 32.hxg5+ Kxg5 33.Ka4 *(33.g3? f4 34.g4 Kh4)* 33...Kf4⇄ is similar.;

C) 30.h5 Kf6 31.hxg6 hxg6 32.Ka3 Ke5 33.Ka4 Kf4 34.Kxa5 Kg3⇄ An illustrative line is 35.Nxc7 Nxc7 36.Kb6 Ba8 37.Kxc7 Kxg2 38.b4 cxb4 39.c5 Kxf3 40.c6 Ke3 41.Bc2 Kf4 42.Ba4 g5 43.Kb6 Bxc6 44.Bxc6 g4 45.Kc5 Ke3 46.Kxb4 f4 47.a4 f3 48.a5 g3=]

30.Be2! Now White has a better chance of safeguarding his kingside. **30...Ng7?** The decisive mistake, now the counterplay will be too slow.

[Also weak is 30...Kh5? 31.g3 f5 32.f4++-]

[The correct way was ⌓30...g5!

31.hxg5+ Kxg5 32.g3 Ng7 and Black is still fully alive - 33.f4+ Kh6 34.Ka3 Nh5⇄]
[Another plausible try is 30...f5!? 31.g3 Nf6 32.Nxc7 Nh5 , for example 33.g4 Nf4 34.Bd1 g5 35.h5 Nd3+ 36.Kc3 Nf2⇄]
31.Ka3 Nf5
[31...Ne6!? 32.g3! *(32.Ka4 Kh5 33.g3 Nd4∞* is unconvincing.) doesn't help anymore: 32...g5 *(32...Nd4 33.Nxd4 cxd4 34.b4!+-)* 33.hxg5+ Kxg5 34.f4+ Nxf4 *(34...Kf5 35.Ka4+-)* 35.gxf4+ Kxf4 36.Nxc7 f5 37.Nd5++-]
32.Ka4 Nxh4 33.Bf1 White already had a choice.
[The direct 33.Kxa5 Nxg2 34.Nxc7 Kg5 35.Kb6+- should win as well.]
33...Nf5 34.Kxa5 Ne3 35.Nxc7! Nepo is faster and can already ignore Black's counterplay. **35...Nxf1 36.Kb6+- Bd7**
[36...Bxf3 37.gxf3 Nd2 38.Kxc5+-]
37.Nd5!? Limits the ♘f1, but
[37.Na6+- or]
[37.Kxc5+- are both good enough.]
37...Kg7
[37...Nd2 prevents a4, but not for long. After 38.Kxc5 Kg5 39.b4 the connected ♙s are too strong: Kf5 40.b5 Ke5 41.a4 Nb3+ 42.Kb4 Nd4 43.Nb6 Be8 44.a5+-]
38.a4 Bc8 39.Ne7 Now the ♙a4 promotes.

older solution with the exchange on f3 unleashes the potential of White's pieces and is more dangerous.

14.Bc2 Bf6 The critical opening position of the new line. Black has given up the e5-point, combines the Zaitsev and Chigorin systems, possibly striving for a Benoni-like structure. Contrary to the main line of the Zaitsev, Black has another point in his favour - he has avoided weakening his kingside with h6. While this is certainly not the classical Closed Ruy Lopez strategy , it's undoubtedly a very interesting approach! Studying this line, one must also take into account numerous engine games - the machines have played it more often than humans!

8.Re1 The drawback of the knight transfer to g6 is that White can expand in the centre. Although he will play d4 later on, this won't be too effective. The immediate advance is played more often and seems to offer more chances to fight for an edge. However, it had already featured in Svidler's previous practice and hadn't brought him any advantage:

[Svidler,Peter]

When I was preparing for the tournament at home, the only things I looked at were two possible black games- vs. Kasparov and Kramnik. None happened, which is

one of the reasons of my success. When thinking about the white game vs Kasparov at home, I simply told myself that Najdorf 6. ♗e3 ♘g4 cannot be all that bad for White. But two rounds before me Alexei Shirov ran into 6...e5 and didn't really pass the opening stage, so I shelved the idea and decided to go for something not so optimistic. **1.e4** Winants Ftacnik **1...c5 2.Nf3 d6 3.c3 Nf6 4.Be2** Winants: Peter Svidler qui souhaitait probablement éviter un débat théorique, sur le thème des grandes variantes de la défense sicilienne, choisit ici un système peu connu, mais néanmoins très dangereux. L'intérêt du dispositif, réside dans son élasticité. D'abord, il faut envisager la formation d'une phalange de pions au centre de l'échiquier, ensuite, songer au développement pianissimo du début italien (d3 suivi éventuellement de 0-0, ♖e1, ♘bd2) et finalement, tenir compte de l'attaque Rossolimo en différé avec l'échec sur b5. **4...Nbd7** La réponse habituelle. D'autres possibilités seraient:

[I. 4...Nxe4?? Winants Une bourde 5.Qa4+ Gagnant le Cavalier]

[II. 4...Nc6 Winants naturel mais maladroit! 5.d4! Un gambit prometteur imaginé par Michael Basman. cxd4 6.cxd4 Nxe4 7.d5 Qa5+ 8.Nc3 Nxc3 9.bxc3 Ne5 10.Nxe5 Qxc3+ 11.Bd2 Qxe5 12.0-0 avec d'excellentes compensations pour les pions sacrifiés, Basman,M-Stean,M Hastings 1973]

[III. 4...g6 Winants également très courant 5.0-0 Bg7 6.Bb5+! 5.d3 As Kasparov's second Yuri Dokhoian said in the press-centre around this moment, 'If we start analysing c3&d3 Sicilians we won't get anything serious done'. My point exactly. **5...b6 6.0-0 Bb7 7.Nbd2 g6** Il est possible que Kasparov se soit laissé influencer par l'aspect tranquille du développement adverse et qu'il n'ait pas pris l'ouverture des Blancs suffisamment au sérieux, pour l'étudier avec toute l'attention requise. Cela expliquerait sans doute la mobilisation optimiste des Fous en fianchetto, mais aussi et surtout, "l'oubli" du Roi au centre de l'échiquier. Peu importe la raison pourtant, car elle plaide pour cette remarquable intuition de Svidler, qui est parvenu à déceler un point faible dans l'incroyable arsenal théorique du champion du monde, jusqu'à le faire vaciller, dès la première tentative. Bien d'autres champions s'y étaient essayés avant lui, mais s'y étaient plus d'une fois cassés les dents.

[Plus prudent était donc 7...e6 Winants 8.Re1 Be7 9.Bf1 Ne5 , comme dans la partie Spragett,K-Petursson,M disputée aux olympiades d'Erevan.]

8.d4!? Voilà! Les Blancs passent à la vitesse supérieure. La menace est

double: soit, le coup stratégique d5, gagnant du terrain et enfermant le Fb7 pour de bon, soit le coup de bélier, e5-e6, dispersant les pions ennemis et ouvrant la voie au ♘f3 (♘g5-e6). Autrement dit, les Noirs éprouvent déjà certaines difficultés et ceci nous laisse supposer que Kasparov rejouera à l'avenir les parties du championnat intercercles français, où Jean-Luc Seret et Jean-Marc Degraeve avaient déjà essayé ce gambit bien avant son adversaire!

[17.Ba4!? Winants]

17...Kxf7 18.Ba4 Les Blancs ont rétabli l'équilibre matériel et ont même obtenu la paire de Fous. Ils pourraient, par conséquent, chercher à ouvrir le jeu, via f4, ou à dresser une batterie Dame-Fou sur la diagonale b1-h7 (Fc2, Dd3), pour infiltrer les lignes ennemies en g6. Pourtant leurs pions sont dispersés (d4, f3 et h2) et l'impression est donc que les Noirs devraient encore disposer de ressources diverses. L'une des difficultés consiste ici à définir le rôle du Cd7. On pourrait certainement le poster en f6, mais il n'y ferait pas grand-chose et gênerait même l'action du Fg7.

[4.Bd3 c5 5.dxc5 Nf6 6.Qe2 Nc6 7.Ngf3]

4...c5 5.Qg4 Kf8 White forced Black to lose his right to castle, but his central pawns chain is about to fall apart. The move in the text is preferable than 5...g6, not to weaken dark squares. **6.dxc5**

6...Nc6 7.Qg3

[The alternatives are: 7.Ngf3]
[7.Ndf3]

7...Nh6!?N This move appeares to be a novelty. At first sight it does not look bad, black's knight is intending to jump on f5 harassing white's queen. On the other hand, the previously played 7...f6 is more tempting and critical.

Adams used up a lot of his thinking time before deciding to accept the repetition of moves. Actually this was a pity, because what Short had prpepared thus remained hidden. But despite its brevity, the game was significant: Short appears to be more or less convinced by 7... ♘h6!?, whereas Adams did not seem to be so struck by Svidler's 10. ♕a4 that hewanted to play it against Short.' Langrock,Hannes: 'Ich war während dieser Partie live in Liverpool vor Ort. Adams verbrauchte einen Großteil seiner Bedenkzeit, bevor er sich entschloss, die Zugwiederholung zu akzeptieren. Schade eigentlich, denn so blieb hinter den Kulissen, was Short vorbereitet hatte. Doch trotz ihrer Kürze ist diese Partie aussagekräftig: Short scheint von 7... ♘h6!? einigermaßen überzeugt zu sein, Adams dagegen scheint von Svidlers 10. ♕a4 nicht so angetan zu sein, um es gegen Short spielen zu wollen.' **10...Bh4** The young Russian star does not mind to repeat moves against Peter Svidler. **11.Qf4**

Es handelt sich im Übrigen wieder um die in Teil 2 der Serie häufig auftretende Konstellation weißer Mehrbauer gegen schwarzes Läuferpaar.]

11...Bg5 Langrock,Hannes: 'The black plan has the practical disadvantage that White here has an early opportunity to repeat moves with 10. ♕g3. But in the given situation, Nepomniachtchi certainly did not necessarily have anything against a quick draw. ' Langrock, Hannes: 'Die schwarze Spielweise hat den praktischen Nachteil, dass Weiß hier die frühe Möglichkeit hat mit 10. ♕g3 die Züge zu wiederholen. In der gegebenen Konstellation hatte Nepomniachtchi aber sicherlich nicht unbedingt etwas gegen ein schnelles Remis einzuwenden. ' **12.Qa4** Langrock,Hannes: '!?' Probably White is not better here, but the tournament situation forced Svidler to push hard for a win. Langrock,Hannes: 'In the game, the moves were actually repeated once and only then did Svidler play 12. ♕a4.' Langrock,Hannes: 'In der Partie wurden in der Tat einmal die Züge wiederholt und erst dann spielte Svidler 12. ♕a4.' **12...Nxe5 13.Ngf3 Nxd3+?!** It's logical to eliminate white's light-squared bishop, however, this exchange improves white's pawnstructure, so the ♙c5 will never fall...

His position is certainly a more pleasant one to play than Black's.' Langrock,Hannes: 'Postny bricht seine Analyse hier mit dem Urteil "Kompensation" ab. Es wäre allerdings interessant zu wissen, wie Schwarz hier weiterspielen soll (ich fand keine wirklich befriedigende Fortsetzung). World-ch Tournament (10) 24.09.2007
[Erenburg,Sergey]

1.e4 c6 2.d4 d5 3.Nd2 dxe4 4.Nxe4 Nd7 5.Ng5 This is the most principled line to fight for an opening advantage.
5...Ngf6
[5...h6? 6.Ne6! is the point of 5.♘g5.]
6.Bd3
[6.Bc4 e6 7.Qe2 Nb6 is another theoretical line.]
6...e6
[Again 6...h6? is met by 7.Ne6!]
7.N1f3 Bd6
[7...h6? allows White to sacrifice a piece for a very strong and long-lasting initiative. We all remember the historical defeat of Garry Kasparov: 8.Nxe6 Qe7 9.0-0 fxe6 10.Bg6+ Kd8 11.Bf4 b5 12.a4 Bb7 13.Re1 Nd5 14.Bg3 Kc8 15.axb5 cxb5 16.Qd3 Bc6 17.Bf5 exf5 18.Rxe7 Bxe7 19.c4 1-0 Comp Deep Blue-Kasparov,G (2785)/New York 1997/EXT 1998]
8.Qe2 h6 Now, this move is ok! **9.Ne4 Nxe4 10.Qxe4 Qc7**
[The move 10...Nf6 is tempting, but loses control over the important e5 square, which becomes apparent after 11.Qe2 Qc7 12.Bd2 b6 13.0-0-0 Bb7 14.Ne5±]
11.0-0 b6 12.Qg4 Forcing Black to make a concession, either to weaken his kingside, or to lose the right to castle.
12...Kf8 Black loses his right to castle, but, on the other hand White can't make use of it immediatly. Meanwhile, Black is going to complete his queenside development and push c6-c5. The alternative 12...g5 disappeared from top tournaments after following brilliant win of Vishy Anand:
[12...g5 13.Qh3 Rg8 14.Re1 Bf8 15.Qf5! Bg7 16.h4 Kf8 17.Qh3 Rh8 18.hxg5 hxg5 19.Qg4 c5 20.Bxg5 cxd4 21.Rad1 Bb7 22.Rxe6!! fxe6 23.Be7+! Kxe7 24.Qxg7+ Kd6 25.Nxd4 Qc5 26.Bf5! Qe5 27.Nf3++-

1-0 Anand,V (2774)-Bologan,V (2650)/Dortmund 2003/CBM 097 (36)]

13.Bd2?! In my opinion, this way of development is not the best one. The main alternative is 13.b3 developing the dark-squared to b2, where it can press Black's vulnerable ♙g7. Recently, White successfully employed also the move 13.♕h4. Here, few recent examples:

[13.Qh4 Bb7 *(13...c5 14.Be4 Rb8 15.Rd1 Ba6 16.dxc5 bxc5 17.b3 f5 18.Bd3 Bxd3 19.Rxd3 Ne5 20.Nxe5 Bxe5 21.Rb1±)* 1-0 Jakovenko,D (2708)-Sasikiran,K (2690)/Foros UKR 2007/The Week in Chess 659 (69)) 14.Re1 Kg8 *(14...c5!? 15.Be4 Bxe4 16.Qxe4 Rd8 17.dxc5 Nxc5 18.Qh4 Kg8 19.b3 Be7 20.Qc4 Bf6 21.Bf4 Qb7 22.Be5 Nd7 23.Bxf6 Nxf6 24.Rad1 Kh7=)* ½-½ Nisipeanu,L (2693)-Sasikiran,K (2690)/Foros UKR 2007/The Week in Chess 660 (33)) 15.Qh3 Re8 *(15...c5? 16.Rxe6! fxe6 17.Qxe6+ Kf8 18.Nh4+-)* 16.c4 Nf6 17.Bd2 c5 18.d5 e5 19.Bc3 g6 20.Qh4 Kg7 21.Nd2± 1-0 Leko,P (2738)-Bareev,E (2643)/Elista RUS 2007/The Week in Chess 657 (41)]

13...Bb7 14.Rfe1

[Deserves further investigation: 14.c4]

14...Rd8 15.Rad1 c5!N Black successfully completed his queenside development and opened diagonals for his bishops. White's kingside is under pressure. Meanwhile, White didn't create any threats against the black monarch, while his queen is actually misplaced. White should already fight for equality.

[15...Nf6 16.Qh4 *(16.Qh3 c5 17.dxc5 bxc5=)* 16...c5 17.Ne5 *(⌓17.dxc5 bxc5 18.Be2=)* 17...cxd4 18.Bf4 Kg8 19.c3 dxc3 20.bxc3 Qe7 21.Qh3 Nd5∓ ½-½ Jakovenko,D (2596)-Adams,M (2738)/playchess.com INT 2004/EXT 2005 (53)]

16.dxc5 bxc5 Black is now threatening to take on f3, so White's reply is understandable. **17.h4** Now, the "h" pawn is not hanging.

[17.Qh3? Bxf3 18.gxf3 This is strategically bad for White.]

17...Nf6 18.Qh3 c4?!

19.Bf1 Bd5 Black is at least not worse, as he is very solid in the center. **20.h5 Kg8 21.Be3**

[21.Bc3 Kh7 22.Ne5 Ne4 *(22...Rhf8!?=)*

A) 23.Rxd5? is parried by Ng5! (but not *23...exd5? 24.Qf5+ Kg8*

21...Kh7 Black has completed an artificial castling. **22.Bd4 Rhe8 23.b3** The exchange on f6 at any time favours Black. So, Svidler is trying to get rid of the ♙c4 in order to make his light-squared bishop more active. **23...cxb3?!** This exchange helps White, because it opens the diagonal for the white light-squared bishop and also opens the "a" file.

[23...Bc5 24.Bxf6 *(24.Be5 Qb6∓)* 24...gxf6 25.Bxc4 Bxc4 26.bxc4 Qf4∓]

24.axb3 Ne4? This is too optimistic.

[Again, solid 24...Bc5 was perfectly playable.]

25.Bb5?

[25.Bd3? f5 gives White nothing.]
[But, 25.Qg4! could punish Black for his mistake.

27.Qg6+ Kg8 28.c4 Ba8 29.Be3? Attacking ♙h6, but missing a simple reply.

[I don't see any better option for White

than the repetition of moves after 29.Be5 Qb6 30.Bd4 Qc7=]

29...Rf8! 30.Bd4 White is forced to admit the mistake and come back with the bishop, not to lose his queen.

30...a6? At this stage of the game, both players were short on time, so, it was obviously extremely difficult to calculate everything in such a messy position. White's queen is actually stuck on g6, all Black needs to do is to remove the ♗d4 and then to trap the queen by ♖f6.

31...Bxc5

[31...Bh2+!? 32.Nxh2 axb5 33.Nf3 Bd5 was another playable option for Black.]

32.Bc4 Qb6?? This move is just a tactical oversight.

[Necessary was 32...Bd5 33.Bxd5 exd5 34.Qxa6 with approximate equality.]

33.Bxc5?? Wrong moves order!

[By 33.Bxe6+! Qxe6 *(33...Kh8?? 34.Qxh6#)* 34.Bxc5 White could win an exchange without any compensation.]

33...Qxc5?! It's not clear why Morozevich gave his ♙e6.

[After 33...Nxc5 White still has to prove his compensation.]

Peter and Alex, who usually don't fight hard each other (number of draws in less than 25 moves), give a real fight this time! **1.e4 c5 2.Nf3 Nc6 3.Bb5 g6 4.Bxc6 dxc6 5.d3 Bg7 6.h3 Nf6 7.Nc3 Nd7** This is one of the most popular plans for black in Rossolimo variation with early Bxc6 nowadays. **8.Be3 e5 9.Qd2** Oratovsky: Most of the players, including top GMs, play this automatically. Of course, this move looks very logical - white keeps the possibility for both 0-0 and 0-0-0 and threatens ♗h6, but since black has an option for long castle it doesn't seem for me the best way for white. It deserved serious attention

[9.Nd2 is a favourite variation of GM Oratovsky, one of experts of Bb5 variation.]

9...h6 10.0-0 Qe7 11.Nh2 Nf8 12.f4 exf4 13.Rxf4 Be6 13...Ne6 leads to white's slight advantage- the way Akopian played vs Van Wely- see the game below. However, Oratovsky recommends 13...Ne6 for black (Oratovsky says : Ne6 move seems more logical then ♗e6);

17...Kb8 18.b4 f5 19.bxc5 fxe4 20.d4 Bc4?! Dubious idea by Alex. Now white get an advantage. 20...g5 leads to very reasonable play for black with mutual chances. Meist zieht Schwarz hier 12... ♗b7, um so bald wie möglich c6-c5 durchsetzen zu können. Weiß spielt dann auf Königsangriff, wie die unten angefügten Beispielpartien zeigen. Svidler wählt einen anderen Plan. Er bereitet mit dem Textzug ♕d8-b6 vor, indem er sowohl ♗d2-g5 wie ♘f3-g5-e4 ausschaltet; dann tauscht er die weißfeldrigen Läufer mit ♗c8-a6. Weiß hat nun keinerlei Aussichten auf Königsangriff. Einen Nachteil hat jedoch die Verfolgung dieses Planes: Schwarz kommt nicht mehr zu c6-c5. Die Bauern auf a5 und c6 bleiben schutzbedürftig, und Schwarz hat keinerlei aktives Spiel.

1.e4 c5 2.Nf3 e6 3.d3 In his latest games Peter started to play and not without success the Paulsen variation. Especialy it helped him in the last Aeroflot Open. So I decided to go for an unusual for him type of position in which he didn't show up any skills (see the notes to the 4-th move). **3...Nc6 4.c3** This continuation was worked out by my coach Vyacheslav Chebanenco. The idea is to prevent the developement of the bishop on g7. Still nowdays is clear that black can achieve it by pushing his knight first either to e7 or to f6.

[4.g3 g6 5.Bg2 Bg7 6.0-0 d5 7.Qe2 Nf6 8.Bg5 h6 9.exd5 Qxd5 10.Nc3 Qd8 11.Be3 Nd7 12.Qd2 a6 13.Ne4 Qe7 14.d4 cxd4 15.Nxd4 Nce5 16.Qe2 f5 17.Nc3± Vescovi Giovanni(2611) - Svidler Peter(2690), Bermuda 2003 It (cat. 15)]

6.Bg2 Bg7 7.0-0 0-0 8.a3?! The idea is right but first I should play
[8.Re1 d5 9.e5 Nd7 10.Bf4]
8...d6 Now would make sence to get use of premature 8.a3
[8...d5!?]
9.Re1 e5 That was the plan which I first saw in Tregubov's game. The idea of settling the knight on f6 and not to e7 is to have the opportunity to play ♘g4 some time and also after d5 the e4 pawn is under pressure.
[9...h6 10.b4 Rb8 11.b5 *(11.Nbd2?! Ng4 12.Qb3 b5 13.Bb2 Qb6 14.bxc5 dxc5 15.Qc2 Bb7 16.Rad1 Rfd8 17.h3 Nge5 18.Bf1 Rd7∓* Popovic Dragan B (YUG) 2324 - Vasovski Nikola (MKD) 2322, Belgrade (Yugoslavia) 2001*)* 11...Na5 12.Ra2±]
10.b4 a6 11.h3! This simple prophilactical move escaped from Vescovi's attention in our previous Poikovsvky game. He suffered a lot but at the end he managed to draw it.

11...b5 The next few moves are proving that Peter doesn't realy know what he wants. Still is not so easy to find the easy way to equality for black -
[11...h6 12.Be3 b6 13.Nbd2 Re8 14.d4 exd4 15.cxd4 Bb7 *(15...cxb4 16.Qc2 Bb7 17.d5 Na7 18.axb4 Nb5 19.Qd3±)* 16.bxc5 dxc5 17.dxc5 b5 18.Qc2 Nd7 19.Rab1↑]

[13...a5 14.Nbd2 Bb7 15.bxa5 Rxa5 16.Qb3±]
14.Nbd2 h6 15.d4! Now it's getting clear that since his third move when white decided to adjourn his d pawn march to the forth rank white considerably improved his position while black we can say weakened it. Actualy this is the idea of all close sicilians play that having in mind the capture of the centre one is trying to prepare for it as better is possible. **15...exd4**
[15...Qc7 16.d5 Nb8 17.Qc2 Nbd7 18.c4 bxc4 19.Nxc4 Rb8 20.Reb1 Nb6 21.Nfd2 Nxc4 22.Qxc4±]

1.e4 c6 2.d4 d5 Caro-Kann sieht heutzutage wie eine unantastbare Festung aus. Zusammen mit der Russischen Partie sind das die zwei Eröffnungen, die die meisten Probleme vor die Weißspieler stellen. Doch im Vergleich zu Russisch erlaubt es Caro-Kann auch, auf einen Konter zu spielen.
3.e5 Heutzutage ist der Vorstoß 3.e5 auf hohem Niveau öfters anzutreffen als die alte Hauptvariante 3. ♘c3. Das Problem nach 3. ♘c3 liegt in der Stellung, die nach den folgenden Zügen aufs Brett kommt:
[3.Nc3 Die "klassische Hauptvariante". dxe4 4.Nxe4 Bf5 5.Ng3 Bg6 6.h4 h6 7.Nf3 Nd7 8.h5 Bh7 9.Bd3 Bxd3 10.Qxd3 e6 11.Bf4 Qa5+ 12.Bd2 Bb4 13.c3 Be7= Die Erfahrungen der letzten Jahren haben gezeigt, dass diese Stellung, die fast forciert aufs Brett kommt, ausgeglichen ist. 14.c4 Qc7 15.0-0-0 Ngf6= Früher spielte man diese Stellung mit dem Bauern auf c2 (ohne ♙b4-♙e7). Der Unterschied ist, dass Schwarz sehr gutes Gegenspiel mittels b5 bekommt. Deswegen greift Weiß öfters zu 3.e5.]
[3.exd5 cxd5 4.c4 Der Panov Angriff. Nf6 5.Nc3 e6 6.Nf3 Bb4 führt ebenfalls zu Stellungen mit gleichen Chancen für beide Seiten.]
3...Bf5 Nun hat Weiß eine Menge an spielbaren Varianten.
[Eine Alternative ist 3...c5 , wonach Weiß zu einem kleinen Vorteil kommen kann. 4.dxc5 Nc6 5.Nf3 Bg4 *(5...e6 6.Be3 Nge7 7.c3 Nf5 8.Bd4 Bd7 9.Qd2 a5 10.Be2 a4 11.0-0 Qa5 12.Bd3 Nfxd4 13.cxd4 Qxd2 14.Nbxd2± Socko - Dziuba (Lubniewice, 2005))* 6.Bb5 Qa5+ 7.Nc3 e6 8.Be3 Nge7 9.a3 a6 10.b4 Qc7 11.0-0 Bxf3 *(11...axb5 12.Nxb5 Qb8 13.Nd6+ Kd7 14.Nxf7±)* 12.Qxf3 Qxe5 13.Bxc6+ Nxc6 14.Na4± Navara - Landa (Erfurt, 2008)]

[Van Wely,Loek]

Peter Svidler is the most stubborn Gruenfeld adherent among the top players. Although he has already faced many suspicious positions (I can already recall a few against Levon Aronian, who by now must have a big headache when thinking about Peter Svidler), he has already made quite a living out of it. Somehow Peter feels very comfortable in these tricky and unclear Gruenfeld positions. So also for this game I was expecting Mr Gruenfeld to pay me a visit, but I decided to keep him on a very tight leash... Peter Svidler ist der hartnäckigste Grünfeld-Verfechter unter den Topspielern. Obwohl er sich bereits vielen verdächtigen Stellungen gegenüber sah (ich erinnere mich allein an ein paar gegen Levon Aronian, der mittlerweile ganz schöne Kopfschmerzen haben muss, wenn er an Peter Svidler denkt), ist er damit nicht schlecht gefahren. Irgendwie fühlt sich Peter in diesen trickreichen und unklaren Grünfeld-Stellungen ziemlich wohl. Daher erwartete ich auch in dieser Partie einen Besuch von Mr. Grünfeld, aber ich beschloss, ihn an einer ganz kurzen Leine zu halten... **1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 Bg7 7.Bc4 c5 8.Ne2 Nc6 9.Be3 0-0 10.0-0 Bd7** Peter's favourite. 1.e4 Ris,Robert **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Bc5!?** I am not sure if this can be called the Moller (5...b5 and 6... ♗c5), but it is a close cousin of those lines. Black's idea is to delay ...b5 so White isn't able to instantly reply with a4. This gives Black a few additional options - for instance the idea of entirely avoiding ... ♖b8 after a4, but at the least it also prevents, or reduces the impact of a few additional lines for White like the ♘xe5 lines. All that sounds good, but Black has to deal with additional options here for White as well, which is the reason why 5... ♗c5 hasn't really been in fashion of late. It is also probably the reason why Topalov chose it here, and he successfully managed to bring Svidler out of book very quickly. **6.c3**

[6.d4!? is another interesting, but very rare option for White to explore.]

6...b5 7.Bc2 But this is the extra option Black has to deal with compared to 5...b5, and 6... ♗c5. At first sight, the bishop is naturally better placed on c2, and if Black just continues in the way of Moller, then White will have a better version. So instead, he ought to go for the forcing **7...d5 8.d4 dxe4 9.dxe5!?** A less popular move, but since Svidler has played it before, it certainly couldn't be a surprise to Topalov.

29.a4 c6 30.Rb8 The king is still not out of the woods. **30...Nc4 31.Bd4 c5 32.Bxf6 Nb6 33.Bd8**

[33.h4± was simpler.]

33...Nd5 34.Ra8+ Kb7 35.Rxa5 Re5 36.Rxc5 Rxe4 37.Rxd5 Rxa4 38.Rf5 Kc8 39.Bg5 Rc4 40.Bd2 It could be argued that Svidler spoilt his advantage a bit in the last moves, but he did reasonably well to reach the time control, and the endgame is still quite unpleasant for White. **40...Rc7** Too passive. The h-pawn is just on a roll now

[40...Rh4 41.Kh2 Bf1 42.Rxf3 Rh5 is an interesting suggestion by the computer. Amazingly, there aren't many ways to improve...but it's hard to say if Black can save the position after 43.Rxf7 Rxh3+ 44.Kg1 Be2±]

41.h4 Kd8 42.Bg5+! A very nice trick. Black would have been in time to control the h-pawn...but White brings mating nets into the game as well! **42...Ke8 43.Rd5 f5**

[43...Rd7 44.Rxd7 Kxd7 should just be lost as the two pawns are too far away. As usual, the computer doesn't understand these opposite coloured bishop endgames very well...]

44.h5 Rc4 45.Rd4! The opposite coloured bishop endgame is of course lost... **45...Rxc3 46.h6 Rc8 47.h7 Kf7 48.Bd8!** The final touch.

11...Nxe4 Black has exchanged his b-pawn for a central one. However, he is a little under developed on the queenside. If he manages to solve these temporary issue, he will be completely fine. Practical esperience proves that Black does so, as can be seen from the many games I'm going to quote below. Sorry if this collection of games is a little difficult to digest - but as I've explained in the introduction, 9...b5 is full of theory!

A new idea of I.Sokolov and J.Piket tried by the first against Anand in Leon in 1994.It's interesting that it was born not as an attempt to alive 10...d4 line after brilliant win of Kasparov in the 10-th game of his match against Anand,but a year before against the same opponent! This is an important alternative to the main move, 10. ♖c1. In principle, White may play ♖b1-c1 later, only after having provoked ...a7-a6.
[For some reason, Svidler does not follow the plan that eventually caused him a recent defeat at the hands of Kramnik: 10.Rc1 cxd4 11.cxd4 Qxd2+ 12.Kxd2 0-0 13.d5 Rd8 And now White played a move that should get the comment "AN", meaning "Almost a novelty", which does not exist in the ChessBase menu. 14.Kc2!? 23.Rxb6 Nxe4 24.Nd2! Black might have underestimated this move, giving up a pawn in order to exchange Black's most active piece. **24...Nxd2 25.Bxd2 Rxd5 26.Rc7** The weakness of the

seventh rank offers White at least adequate compensation for the pawn. Black needs to display a certain amount of accuracy. **26...Rad8 27.Bc3 f5?!** This offers White some practical chances.

[I would prefer the safer 27...R5d7 28.Rxd7 Rxd7 29.Bxa5 Ra7 30.Rb5 Kf7 with a probable draw, since White has no easy way to advance his passed pawn.]

31...Rd5 The course of the game in the next phase makes me think that Black had not decided yet whether to try maintaining the material equality or look for a drawn ending with a pawn down.

[The standard defensive method does not seem to work here: 40...Ra4 41.Kd3 h5 *(41...h6 42.a6 g5* weakens the f5-pawn, allowing a relatively simple win: *43.Ra8 Kg7 44.a7 Ra1 45.Kc4 Ra5 46.Kb4 Ra1 47.Kc5 Ra5+ 48.Kd6 Ra6+ 49.Ke5 Ra5+ 50.Ke6 Kh7 51.Kf6 g4 52.Ke6 Kg7 53.Kd6 Ra1 54.Ke5 Ra5+ 55.Ke6 Kh7 56.Kf6* White will win the f5-pawn soon and advance his own f-pawn, winning.*)* 42.h4 *(42.a6 h4 43.Ra8 h3⇄)* 42...Ra3+ 43.Kc4 Rxg3 In a famous ending analysed by Smyslov and Levenfish in 1957, the white king is placed more passively somewhere on the second rank, allowing Black to save the game with a srudy like idea. 13.c5 d5 14.Nxe6 Bxe6 15.Bf4 b5 16.Bxb8 Qxb8 In such closed positions, the material does not always prove to be quite so decisive; the potential of the pieces is often more important. For example, if White still had a black-squared bishop instead of a white-squared one, a black bishop would quickly appear on f3 and Black would take the initiative. In this position, however, White has no big weaknesses, so Black would have to open the position with g6/h6/g5/f4 if he had ambitions. This operation, however, opens up lines which, as is well known, cannot be used

so optimally by diagonal players. In this case, the superiority of white rooks over black rooks would become noticeable. Therefore, Black should rather keep quiet and wait to see if White does something crazy, like sacrificing on b5. White, on the other hand, can hardly open up the position in any meaningful way either, which means that the situation at hand should simply end peacefully with risk neutrality on both sides. In solch geschlossenen Stellungen erweist sich das Material nicht immer als ganz so entscheidend, wichtiger ist oft das Potential der Figuren. Hätte Weiß beispielsweise noch einen schwarzfeldrigen Läufer, statt eines weißfeldrigen, würde schnellstens ein schwarzer Läufer auf f3 auftauchen und Schwarz würde die Initiative übernehmen. In dieser Stellung hat Weiß allerdings keine großartigen Schwächen, womit Schwarz mittels g6/h6/g5/f4 die Stellung öffnen müsste, falls er Ambitionen hätte. Durch diese Operation werden allerdings Linien geöffnet, die bekanntermaßen von Schrägschießern nicht so optimal genutzt werden können. In diesem Falle würde sich die Überzahl von weißen gegenüber schwarzen Türmen bemerkbar machen. Daher sollte Schwarz eher ruhig halten und abwarten, ob Weiß etwas verrücktes macht, wie z. B. auf b5 zu opfern. Weiß hingegen kann die Stellung auch kaum sinnvoll öffnen, womit die vorliegende Situation bei beiderseitiger Risikoneutralität schlichtweg friedlich enden sollte. **17.Ne2 a5 18.Nf4 Bf7 19.Be2 g6 20.Qc3 Qc7 21.0-0-0 Ra8 22.Kb1 Qd7 23.Rdg1 h5 24.Rc1 Bd8 25.Qd2 Kg7 26.Rc2** What you can take away from this game: 1) After the slow 2.g3, the proposed setup with e5/Be7/d6/f5 can be taken favorably without worrying about flying apart right in the center. 2) Nh4!? is an interesting motif/sacrifice to seriously consider in such situations, as it gives the knight more options (e.g. also e3) 3) Bg5 only really makes sense in these structures if Black already has c6/d5, otherwise Black can go over to the c5!? plans 4) Na6/Nc7 is a typical very harmonic maneuver. Was man von dieser Partie mitnehmen kann: 1) Nach dem langsamen 2.g3 lässt sich das vorgeschlagene Setup mit e5/Le7/d6/f5 günstig einnehmen ohne Sorge zu haben, dass man direkt im Zentrum auseinanderfliegt 2) Sh4!? ist ein interessantes Motiv/Opfer, was man in solchen Situationen ernsthaft in Erwägung ziehen sollte, da es dem Springer mehr Möglichkeiten bietet (z.B. auch e3) 3) Lg5 ergibt in diesen Strukturen nur wirklich Sinn, wenn Schwarz bereits c6/d5 stehen hat, sonst kann Schwarz zu den c5!?-Plänen übergehen 4) Sa6/Sc7 ist ein typisches sehr harmonisches Manöver

[Another option is a typical sacrifice of the ♙c4 pawn: 6.e4 Bb4 7.e5 Nd5 8.Bd2 b5 White often gets a long-term compensation for the pawn.]

6...c5 In fact, the position transposes to the Queen's Gambit Accepted where Black has lost a tempo by playing c7-c6 and then c6-c5. White's extra tempo is the move a2-a4. On the one hand it helps White to seize space on the queenside. On the other hand, it

weakens the b4 square and this is what Black is counting on. In future, this square might be used for a knight transfer ♘b8-c6-b4 to a key blockading d5 square. **7.Bxc4 Nc6 8.0-0 cxd4**

1.Nf3 Nf6 2.g3 d5 3.Bg2 e6

[The traditional way to meet the Reti is 3...c6 but over the past years White has discovered many new ideas. As I have found out from my own games, there is a strong trend towards the game move.]

4.0-0 Be7 5.d3!?

[Deviating from what Karjakin must have expected, the main Catalan line: 5.c4 0-0 6.d4]

5...0-0 6.Nbd2 c5 7.e4 Nc6 8.Re1 In the remote past, the King's Indian Attack proved a deadly occasional weapon in Fischer's hands and in the nineties it served well a whole generation of Moldavian players. **8...b5** Black's best way to meet White's slow kingside attack is based on the massive queenside pawn storm.

[By piece pressure alone Black does not get much: 8...b6 9.e5 Nd7 10.Nf1 Bb7 11.h4 Qc7 12.Bf4 Rac8 13.N1h2 Nd4 14.Nxd4 cxd4 15.Re2 Qc5 16.Nf3 Rc7 17.a3 a5 18.Kh2 Rfc8 19.h5 Bc6 20.h6 g6 21.Qd2 Ba4 22.b3 Bb5 23.Bg5 Bf8 24.Qf4 Qc3 25.Ra2 Ba6 *(25...Bc5 26.Qg4)* 26.Nxd4+- 1-0 (56) Andriasian,Z (2609)-Shahinyan,D (2431) Yerevan 2014]

9.exd5!?

[A relatively rare continuation. In game six Svidler switched to the thematic 9.e5 followed by ♘f1, h4-h5, which is clearly the main line. Nd7 10.Nf1 b4 *(* Playing with White, Karjakin had

Karjakin's next move "solved" this problem for White. Ra3? Abandoning the back rank will not have immediate consequences yet, but it will cause the exchange of queens. 38.Rb8 Ra8 39.Qb7! Qxb7 40.Rxb7 1-0 Carlsen,M (2861)-Karjakin,S (2780) Tata Steel-A 75th 2013 (8) Suddenly, the d4-pawn is weak and the white king is ready for taking active part in the attack. This type of ending must have raised some unpleasant memories to Karjakin, connected with the partly similar position from Ra3 For the second time in a short while the rook steps on this square hoping to get some counterplay. *(40...Rd8* would not have saved the pawn: *41.g4 Ba3 42.Nd2 Bf8 43.Ke4* White can combine the attack based on f4-f5 with attacking the pawn with ♘b3 or ♘f3, with every chance to win. *)* 41.Rb8! Svidler,P (2727)-Karjakin,S (2762) Baku 2015 (1-0, 58)]

9...Nxd5 Black's choice is a mere matter of taste. The game move leads to a reversed King's Indian. The only problem is that what could be entirely satisfactory for Black (equality) might not be too promising when inverting colours even with an extra tempo.

[Finally a novelty over 11.Bd2 as played in the game between lower rated players Grossmann,S (1886)-Lindenberg,G (1889) Greifswald 2003 (0-1, 29)]

11...a6 I do not see the need for defending the b5-pawn since Black will advance it on the very next move.

[11...h6 makes some sense, preventing ♗c1-g5 and if 12.a4 b4 the pawn is not really needed on a6.]

12.a4 b4

[Once again 12...h6 looks more constructive.]

13.Bg5!? A refined positional move. Black is forced to weaken either the defence of the c5-pawn or else the e6-pawn. **13...f6 14.Bd2 e5**

[The developing 14...Qb6 offers White some tactical ideas: 15.a5 *(15.Bh3!?)* 15...Nxa5 16.d4⩲ Suddenly, several white pieces threaten to put unbearable pressure on e6.]

15.Rc1 0-1 Zita,F-Bronstein,D Moscow-Prague 1946 (6) The position remains typical for a reversed ...exd4 King's Indian, but Black is slightly underdeveloped, his queenside is weak and his queen's bishop misplaced, belonging rather on e6 than b7. One of the first games revealing the drawbacks of having the bishop on the long diagonal was **15...Rf7** If Black could regroup with ... ♗f8 and ... ♖d7 White would face certain problems with his d3-pawn, but Svidler's answer proves this plan too slow.

[The more natural 15...Qd7 would not have yielded Black absolute safety either: 16.cxb4 cxb4 *(* With the a2-g8 diagonal defended by the rook on f7 or the bishop on e6 Black could react with *16...Ndxb4* but here this loses a pawn: *17.Nxc5 Bxc5 18.Rxc5 Nxd3? 19.Qb3+ Kh8 20.Rd5+-)* 17.Nc5 Bxc5 18.Rxc5 Black is not in immediate danger, but his position is hanging a bit.]

16.d4! bxc3?! Karjakin must have understood perfectly that opening the b-file could cause him problems with the b7-bishop, but thought that getting rid of the c6-knight would bring some relief.

[16...cxd4 offers better chances for equalising: 17.cxd4 exd4 *(17...Nxd4* is slightly worse, even though preferable to the game continuation: *18.Nxd4 exd4 19.Qb3* followed by ♘c5 and the inevitable retrieval of the d4-pawn. 17.bxc3 cxd4 18.cxd4 Nxd4
[18...exd4 does not spare Black problems. 19.Qb3 Rb8 *(19...Qd7 20.Bh3!+-; 19...Bf8 20.Nc5 Bxc5 21.Ng5!!+-)* 20.Nfg5! 1-0 Suba,M (2500)-Solozhenkin,E (2515) Berga op 1993 (7) Before thinking that these are just computer moves, one should have a look at the following brilliant game displaying similar ideas in more complicated shape. fxg5 21.Nc5 Ncb4 22.Nxb7 Rxb7 23.Bxb4 Rxb4 24.Qxd5 Kf8 25.Qxd8+ Bxd8 26.Rc8 Rd7 27.Bc6 wins material.]
19.Nxd4 exd4 20.Qb3± Despite his extra pawn, Black's position is very difficult. His pieces are exposed, both wings are weak and the d4-pawn is doomed in the long run. 14...Bxd6
[14...Ke7 Rogozenco,Dorian The only purpose of this move is trying to keep things more complicated. Objectively it is worse than taking on d6.
A) White could achieve a large positional advantage with 15.c5 Nd5 *(15...Ba6+ 16.Kf2 Bxf1 17.Rxf1±; 15...Qa5? 16.Qd4 Ba6+ 17.Kf3+-)* 16.Qd4 Kf8 17.Kf2±;
B) 15.Nxc8+ Of course White is also better after this, but generally if possible, it makes sense to keep the knight on d6 rather than exchange it for the undeveloped light-squared bishop. 15...Qxc8 16.Qa4 A rather committal move.

The queen might be better off in the center. Bd6 17.c5 Bc7 18.g3 Rb8 19.b3 a5 20.Bd2 Qe8 0-1 Rmus,A (2355)-Rogozenko,D (2530)/ Bucharest 2004 (53) and Black got some counterplay on the kingside.]

28.Rxa7 This simple solution is easy to understand - Grischuk was (as usual) already running short of time.
[28.b3!? is an interesting attempt to avoid the game continuation. After the game at the press-conference Svidler said this is what he was more afraid of, but here Black can already retain his

12.exd5 It is a critical position for the variation.In my subjective opinion,it is very hard for white to get something.The knight on b3 is standing very bad, therefore it is very hard to push the pawns on queen's flank.But even if white will suceed in doing it-it is not enough!In order to win, white should have an advantage on both flanks and this is not easy. **12...a5**

Olympiad-37 Turin (8) 29.05.2006
[Rogozenco,Dorian]

1.d4 d5 2.c4 c6 3.Nc3 Nf6 4.Nf3 dxc4 5.a4 e6 This move started to appear on modern high level practice after Kramnik implemented it in the match versus Leko. Svidler was Kramnik's second and it is not surprising that he included it in his repertoire.

However, 5...e6 suits better as a one-time surprise weapon rather than a constant part of one's opening repertoire. **6.e3** The safe continuation, which secures a typical middlegame initiative in a position with an isolated pawn.

[Another test for Black's set-up is the more aggressive 6.e4]

6...c5 In order to complete development Black must go for a QGA type of position. His justification for the two-steps advance of the pawn to c5 is that White's extra-tempo a2-a4 is not very useful. **7.Bxc4 Nc6 8.0-0** We have a well-known variation of the Queen's Gambit Accepted, where Black has the pawn on a6: 1.d4 d5 2.c4 dxc4 3. ♘f3 ♘f6 4.e3 e6 5. ♗xc4 a6 6.a4 c5 7.0-0 ♘c6 8. ♘c3. As we'll see, in opposite to QGA, here Black's pawn on a7 instead of a6 reduces Black's possibilities, which basically means that Black's entire opening concept has obvious drawbacks. **8...cxd4**

[Although less attractive than in QGA, where it represents the most solid continuation, here 8... ♗e7 could be the best option as well: 8...Be7

A) In the variation 9.Qe2 cxd4 10.Rd1 Black must play 0-0 *(Not 10...e5* which equalizes with the pawn on a6, since after *11.exd4 exd4 12.Nxd4 Nxd4* White has a nasty check on b5: *13.Bb5+ Kf8 14.Qe5↑)* 11.exd4 Nb4 White's chances are slightly preferable here, but Black at least avoided opponent's plan from the game (♗g5 and ♖e1).;

B) 9.dxc5!? Qxd1 10.Rxd1 Bxc5 The pawn would certainly be more useful for Black on a6 than on a7. In QGA with the pawn on a6 Black is able to equalize such an endgame. Here having square b5 at his disposal White has more possibilities to fight for advantage.]

12...h6N Before the present game the position was met in practice only twice. Svidler's novelty is designed to either exchange White's bishop (in case of the answer 13. ♗h4), or after 13. ♗f4 to implement the main plan with ... ♘b4 and ...♗c6. Certainly Black would be better off without weakening his kingside pawn chain, but with the bishop on g5 exerting pressure on Black's position, it is more difficult to establish control over square d5 by means of ... ♘b4 and ... ♗c6 (see 12....♘b4).

[With almost finished development and good control over square d5 the second player has little to worry about after the exchange of dark-squared bishops: 13.Bh4 Nh5 14.Bxe7 Nxe7 15.Ne5 Nf6 allows Black to equalize.]

13...Nb4 14.Ne5 Bc6 Black implemented his idea and Svidler must have calculated very precisely the consequences of the sacrifice on f7. However, White simply improves the position and because of the weakened kingside pawn-structure by the pawn on h6, Black still finds himself under

pressure. **15.Rad1**
[With the bishop on f4 the knight sacrifice is less clear: 15.Nxf7 Rxf7 *(15...Kxf7? 16.Qxe6+ Kg6 17.Qxe7+-)* 16.Bxe6 *(16.Qxe6 Nbd5∞)* 16...Nbd5 17.Be5 Nxc3 18.bxc3 Bd5 19.Bxf7+ Bxf7 20.c4 Rc8∞]

17.Rd3! This position is much easier to play with White, who has plenty of attacking ideas. The problem for Black is that he does not have counterplay yet, while his opponent arranged optimally the pieces and can play actively both in the center and on the kingside. **17...Ne7**

1.d4 g6 2.c4 Bg7 3.Nf3 Nf6 4.Nc3 0-0 5.Bg5 This setup has earned some popularity these days, although it's main advantage is that White can avoid the theoretical main lines and the position has a complex strategical character with many possibilities for transpositions.

I decided to annotate this game for a few reasons. The first and foremost was, of course, my laziness, because of which I like annotating my short games more than long and somebody else's. Secondly, it was the very first victory of the tournament. And finally, it is (or rather could be) quite interesting. **1.e4** Winants Ftacnik **1...c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Bb4** This did not exactly cheer me up, since I've looked at this line when I was a kid and decided that it was pretty bad for Black (and it's probably true) and never had a look at it again. **6.e5 Nd5 7.Bd2**

7...Nxc3 8.bxc3 Be7 9.Qg4 0-0 While 9... ♔f8, 9...g6 and even 9...g5 were all tried before, 9...0-0 is the only manly move at Black's disposal. Up to

this point I almost didn't think at all, being sure it was the main line, but when Amador played 9...0-0, I stopped and tried to remember what I was supposed to do. Were there any alternatives to 10.Bh6? If not, should White go for the king or just take on f8? After realizing that I basically have no clue, I decided that the team will be happier seeing me with an exchange up, and opted for

10.Bh6 g6 11.Bxf8?!

[I had a guts feeling that 11.h4 is very strong, and indeed it was, but I reasoned that if Amador played this line, he must have something up his sleeve there, and the team competition is not a place to seek enlightning. Those who like bloodshed and violence may consult ECO or, if they're into stylish prose as well, John Nunn's treatise 'How to beat the Sicilian, for the details of this starightforward approach. Interesting plan!Black's knight and bishiop are worse than white's and are far away from the queen's flank.So, Svidler wants to open it.But there is only one "litlle" thing-white has weaknesses on king's flank,from which black's peices are not far away!I'm not really sure who is better after 20...Kh8! with idea 21...f6!

Moscow Tal Memorial 1st (7) 14.11.2006
[Gelfand,Boris]

1.Nf3 Gelfand During recent years in my White games against Peter Svidler we have had a theoretical discussion in the main Gruenfeld 8. ♖b1 system. However, during the recent European club cup, my friend and teammate Alexander Khalifman had told me about some interesting ideas in the Anti-Gruenfeld, which he published in his recent book "Opening for White according to Kramnik-1a", which went out of print in August 2006. Unfortunately, I managed to buy this book only just at the very end of the Tal Memorial... So, the day before this game my second Alexander Khuzman and I had to work hard to develop the ideas mentioned by Khalifman. In meinen Weißpartien gegen Peter Svidler in den letzten Jahren hatten wir eine theoretische Diskussion im 8.Tb1-System der Grünfeld-Hauptvariante. Doch während der letzten europäischen Clubmeisterschaft hatte mir mein Freund und Mannschaftskollege Alexander Khalifman von ein paar interessanten Ideen im Anti-Grünfeld erzählt, die er in seinem aktuellen Buch "Opening for White according to Kramnik-1a" veröffentlicht hatte, das im August 2006 in Druck ging. Leider konnte ich das Buch erst kurz vor dem Ende des Tal-Memorials kaufen. Am Tag vor dieser Partie mussten daher mein Sekundant Alexander Khuzman und ich hart arbeiten, um die von Khalifman erwähnten Ideen zu entwickeln. **1...Nf6 2.c4 g6 3.Nc3 d5 4.Qa4+ Bd7 5.Qb3 dxc4 6.Qxc4** The bishop on d7 is placed worse than on c8 and this is a point of White's setup. Auf d7 steht der Läufer schlechter als auf c8, und das ist eine Pointe des weißen Aufbaus. **6...a6 7.d4** The most natural continuation in the main line of the Anti-Gruenfeld Die natürlichste Fortsetzung im Hauptabspiel des Anti-Grünfeld.

12.e5! I had to find this strong move over the board, even though it is analysed in Khalifman's book. I had to understand the difference in the bishop's position. The black bishop is on c6, while in the theoretical line of the 5. ♕b3 (1.d4 ♘f6 2.c4 g6 3. ♘c3 d5 4. ♘f3 ♗g7 5. ♕b3 dxc4 6.♕xc4 0-0 7.e4 a6 8. ♗e2 b5 9. ♕b3 c5 10.dxc5 ♗b7) variation it is on b7. And it is an important difference. The ♗ is taking the important c6 square from his ♘ and blocking its way to d4. Thus, Black has to develop his pieces more passively and White has time to create weaknesses in his opponent's camp by a2-a4. Diesen starken Zug musste ich am Brett finden, obwohl er in Khalifmans Buch analysiert wird. Ich musste den Unterschied in der Postierung des Läufers versteht. Der schware Läufer steht auf c6, während er im theoretischen Abspiel der Variante 5. ♕b3 (1.d4 ♘f6 2.c4 g6 3. ♘c3 d5 4. ♘f3 ♗g7 5. ♕b3 dxc4 6. ♕xc4 0-0 7.e4 a6 8. ♗e2 b5 9. ♕b3 c5 10.dxc5 ♗b7) sich auf b7 befindet. Und dies ist ein wichtiger Unterschied. Der ♗ nimmt seinem ♘ das wichtige Feld c6 und blockiert dessen Weg nach d4. Somit muss Schwarz seine Figuren passiver entwickeln, und Weiß hat Zeit, durch a2-a4 im Lager seines Gegners Schwächen zu schaffen.

[12.0-0 Nxe4 13.Nxe4 Bxe4 transposes into one of the main positions of the 5. ♕b3 system, where I have only a general knowledge. I think that it was Peter's idea to get me out of the lines which I normally play. geht über zu einer der Hauptstellung des 5. ♕b3-Systems, wo ich nur allgemeine Kenntnisse besitze. 11...Qc7 12.Qd2 Ne5 13.Be2 The first palpable problem is a loss of a tempo, white has to defend the sensitive point f3. **13...Be7 14.Bg3?!** The retreat of the bishop will turn out to be an unfortunate move. White does not exactly need to move the f pawn.

1.c4 e5 2.Nc3 Nc6 3.Nf3 f5 I guess this came as a real susprise for Peter. This system is rarely seen on the top level. **4.d3** Not the most principled response.
[4.d4 e4 is the main theoretical line here, but it requires a lot of knowledge from both players.]
4...Nf6 5.g3 Bb4 6.Bg2 This move is connected with a definite strategic risk, since White's q-side pawn structure becomes less flexible, while the bishops are not so strong in such a closed positions.
[That's why 6.Bd2!? 0-0 7.Bg2 d6 8.0-0 makes a lot of sense. For instance, Bd7 *(⌓8...Bc5 9.e3 a6)* 9.a3 Bxc3 10.Bxc3 Qe8 11.e3 f4 12.exf4 exf4 13.Qd2± 1-0 Grandelius,N (2536)-Tikkanen,H (2591)/Germany 2011/CBM 146/[RR] (65)]
6...Bxc3+ 7.bxc3 d6 8.0-0
[8.Qb3 0-0 9.c5+ d5⇄]
8...0-0 9.Rb1 Qe8 10.Qb3?! It looks like Peter wasn't familiar with the chosen opening system. The queen has no good prospects there, so White is just losing a tempo.
[White's play should be based on attacking the opponent's pawn centre by means of 10.c5 dxc5 *(10...Qh5 11.cxd6 cxd6 12.Ba3 Rd8 13.Qd2 Rb8 14.Qg5 Qxg5 15.Nxg5± 1-0 Vaganian,R (2625)-Dzindzichashvili,R (2530)/Saint John 1988/EXT 1997 (53); 10...d5 11.Bg5 Qh5 12.e3 e4 13.Bxf6 Rxf6 14.Nd4 Qxd1 15.Rfxd1 Ne5 16.Nb5 c6 17.d4 Nc4 18.Nc7 Rb8 19.Na6 Ra8 20.Nc7 Rb8 21.Bf1± ½-½ Ubilava,E (2525)-Kristiansen,J (2430)/Kecskemet 1989/TD (46))* 11.Be3 Qe7 12.Qa4 Kh8 13.Nd2⩱]

10...b6N This natural move is a sound novelty in a rare position. Objectively speaking, Black's position already looks better, since White lacks any counterplay on the q-side.

[Another energetic way to handle the position is 11...e4!? 12.f3 h6 13.fxe4 fxe4 14.Nf5 Bd7∓]
12.Qa3 It is not easy to find a useful place for the queen now.
[12.Qc2 Rb8 13.Bg5 h6 14.Bxf6 Rxf6∓]
12...Rb8 13.Be3?! One more inaccurate move - the ♗e3 is just a target for Black's pieces, while f5-f4 would come with tempo.
[The lesser evil was 13.Bg5 h6 14.Bxf6 Rxf6∓ getting rid of the useless bishop.]
13...f4! An obvious temporary pawn sacrifice. **14.gxf4** Accepting the challenge.

[14.Bd2 Bg4 15.Rfe1 Qh5∓]

14...Qh5 Black's attack plays itself now.

24.Qb5 Black has many good possibilities, but here the miracle comes... **24...Rfxf4?** A terrible misclaculation. Magnus has missed a nice defensive resourse.

29.Kxe2 Nxc3+ 30.Kf2 Nxb5 31.Rbg1 Now White's king is well protected, but the ♔ f8 is under fire. **31...Nc3?** A natural mistake in such a scary situation.

[It was very difficult to find the most precise defence: 31...Nbd6 32.Rg8+ Ke7 33.R1g7+ Kf6 34.Rxc7 d4! freeing a way out for the monarch 35.Rf8+ *(35.Ng5 Qd1 36.Rf8+ Kg6 37.Rg8+ Kf6=; 35.Nxd4 Qd1 36.Rf8+ Kg6 37.Rg8+ Kf6=)* 35...Ke6 36.Nxd4+ Kd5 37.Nf3 Ne4+ 38.Ke2

34.Rc8+ Kf7 35.Rc7+ Kf8

[Magnus had no reason to refuse the draw at this point: 35...Kf6 36.Rc6+ Ne6?! *(36...Kf7=)* 37.Nd4 Qh4+ 38.Rg3 Qxf4 39.Rf3 Qxf3 40.Nxf3±]

36.Rc8+ Kf7 37.Rc7+ Kf8 A very disappointing draw for Magnus in this game!

Legends of Chess Prelim rapid (7.4)

[Kasimdzhanov,Rustam]

This is the fourth game of the match in a preliminary stage of the tournament. First 3 games were drawn, with Svidler defending some pretty shaky positions.

1.d4 Nf6 2.Nf3 g6 3.Bf4 Bg7 4.e3 0-0 5.Be2 c5 6.0-0 Qb6 7.Nbd2 d5

[7...Qxb2 was surprisingly possible, but nobody does that in rapid, of course - 8.Nc4 Qb5!]

8.Qc1 a bit passive. After

[8.dxc5 White would have more chances to fight for initiative, for instance Qxb2 9.Be5 Qa3 10.c4 Qxc5 11.Nb3 Qc6 12.Rc1]

8...Nc6 9.c3 Nh5! 10.Bg5 h6 11.Bh4 g5 12.Bg3 Nxg3 13.hxg3

White played the opening as if he were playing with the black pieces. A similar

strategy was often employed by Gata Kamsky. **13...e5** Not the only way to continue.

[13...Bf5 14.Nb3 c4 15.Nbd2 Rac8 16.b3 cxb3 17.axb3 a6 18.b4 White keeps his fair share of chances here.]

14.Nxe5 Nxe5 15.dxe5 Bxe5 16.e4 dxe4 17.Nc4!? Magnus starts a very brave attempt at complicating matters.

[17.Nxe4 Bf5 18.Nd2 Rad8 19.Nc4 Qc7= is much more simple.]

17...Qe6

[17...Qc7 18.Qe3 Bf5 19.Rad1 Rad8 20.Nxe5 Qxe5 21.f4 the point gxf4 22.gxf4 Qg7 with a mess]

18.Qe3 Bg7?! Maybe slightly inaccurate.

[After 18...Bc7! Black controls d6, and feels much safer. 19.Qxc5 Qc6! 20.Qxc6 bxc6 and only Black could be better here, though White should be able to hold, of course. 21.g4 Be6 22.Nd2 f5 23.gxf5 Bxf5]

19.Qxc5

[19.Rad1!? Not a bad idea, actually. b6 20.Nd6 Qe5 21.Nxc8 Raxc8 22.Rd7 Rc7 *(22...Qe6 23.Rxa7)* 23.Rfd1 and White has a lasting compensation for the pawn.]

19...b6

[19...Qc6!? was maybe simpler: 20.Qxc6 bxc6 21.Rfd1 Be6 probably leads to equality after 22.Na5 Rab8 23.Rd2 Rb6 *(or 23...Rxb2 24.Rxb2 Bxc3 25.Rab1 Bxa5⩲)*]

20.Qa3 f5?! Very natural, but does create weaknesses and ignores the development a bit too much.

[After 20...Qc6 21.Rad1 Be6 22.Ne3 Rfd8 Black keeps his king very safe and has a full share of chances: 23.Qa6 *(23.Rxd8+ Rxd8 24.Qxa7 Bf8 25.Rd1 Ra8 26.Bb5 Rxa7 27.Bxc6 Rxa2)* 23...f5 24.g4 f4 25.Nf5 Kh8]

21.Rad1 Now Black has to solve some serious tactical problems. **21...Bd7** Maybe not the best.

[21...Qg6 22.g4!? *(22.Rd6 Be6 23.Ne3 Kh8 24.Bc4 Rf6* Black hangs on in this slightly awkward manner. *25.Qb3 Re8 26.Bxe6 Rfxe6 27.Rxe6 Rxe6 28.Qd5 f4 29.Nf5 Re5 30.Qd8+ Re8 31.Qd7 Bf8∞)* 22...fxg4 23.Rd6 Qe8 24.g3 Kh8 25.Ne3 Be6 26.Qb4 Bg8 27.Bc4⩱]

[21...f4 22.Nd6 *(22.Rd6 Qe7 23.Nxb6 axb6 24.Bc4+ Be6! 25.Rxe6 Qxa3 26.bxa3 Kh8±)* 22...Kh8 23.gxf4 Rxf4 *(23...gxf4 24.Nxe4! Bb7 25.Bf3!±)* 24.Bc4 Qe7 25.Bd5 Rb8 26.Bxe4±]

[21...Kh8 22.Rd6 Qf7 23.Nxb6±]

22.Rd6

[22.Ne3! was already very strong: Kh8 23.g4 *(23.Rd6!? Qe8* transposes, see below.*)* 23...f4 24.Nf5 Be5 *(24...Rxf5 25.gxf5 Qxf5 26.Qe7±)* 25.Bc4 Qe8 26.Bd5±]

22...Qe8

[22...Qe7 23.Ne3 *(23.Nxb6* is too cheap: *axb6 24.Bc4+ Be6 25.Rxe6 Qxa3±)* 23...Rf6 24.Rfd1 White keeps quite some pressure.]

23.Bh5?! Not the best, but finding the right line would be tough under any circumctances.

26.Rxe6!

[26.gxf4 gxf4 27.Rxe6 Qxa3 28.bxa3 fxe3 29.fxe3 leaves less pawns on the board and probably favors Black.]

26...Qxa3 27.bxa3 fxe3 28.fxe3 Rxf1+ 29.Kxf1 This endgame looks like it shouldn't be too difficult, but Magnus is especially dangerous in these positions. The rest of the game is deeply impressive. **29...Kf8**

34.Rd6

[34.Rc6 Rc5 35.Rd6 has a point, too.]

34...Ke7 Svidler plans on holding the game by staying solid, but perhaps he should have grabbed the chance for some activity.

[34...g4!]

35.Rg6 Kf8

[35...Bf8!? with the same theme, trying to limit White's rook activity, was the best defence. 36.a4 *(36.g4 Kd7)* 36...Kd7 37.Kd3 but still tough, of course.]

36.g4! Now the World Champion turns

47.Rxa5 Ke7 48.Bb3 Rb7 49.Ke4 Bf8 50.Kf5 Rc7 51.Ra6 Ke8 52.Kg6 Rb7 53.Re6+ A slight slip.

[53.e6! Rc7 54.Ra5 was game over.]

53...Kd8?

[53...Be7 and there's still a bit of work to be done. 54.Bd5 *(54.Kxh6 Rb6!)* 54...Rb4 55.Bc6+ Kf8 56.Kxh6 Rxg4 57.Kg6 Rb4]

At the end of this game Magnus still had about 10 minutes, having started with 15. I can't think of many players in history capable of this level at this speed. Very, very impressive stuff.

Until recently it was thought that 8.c3 was the only serious move, but this has been played by Wei Yi recently as well as Dominguez, so it's time the move received some attention. We could compare this with the 6.d3 b5 7. ♗b3 d6 8.a4 variation, except that in some cases (such as the game) White can play d4 in one go. Previously Dominguez had generally gone for the main line or d3-systems against Svidler. **8...b4** 3:33
This has been Black's main move in recent games, although White can then try to transpose back to an Anti-Marshall system.
[8...Na5?! 9.axb5 Nxb3 10.cxb3 clearly doesn't give Black enough for the pawn.]

25...Nh5? 7:22 After this loss of time White takes control of the game. I doubt Black really wanted to go for this, but he probably couldn't prove the alternatives were better.

Hecht: The ending is easily won, because the pawn on e5 can't be taken and the king can't reorient itself towards the first ranks because of e6+. Also, Black has hardly any checking possibilities. {#} Hecht: Das Endspiel ist leicht gewonnen, da der Be5 nicht zu nehmen ist und der König sich wegen e6+ nicht nach hinten orientieren kann. Zudem besitzt Schwarz kaum Schachmöglichkeiten. **51...Kd5**

Hecht: A brief example follows of Black moving in the direction of the kingside. This cannot claim to be exhaustive, but in should show that White can continually work with queen exchange threats even when a pawn is lost thereby. Ein kleines Beispiel folgt, wenn Schwarz sich zur Königsseite orientiert. Es hat keinen Anspruch auf Vollständigkeit, sondern soll nur zeigen, daß Weiß bei zwei Mehrbauern ständig mit der Damentauschdrohung selbst unter Bauernverlust arbeiten kann.

[Ribli,Zoltan]

1.Nf3 Ftacnik Donev Das ist Kramniks Lieblingszug. Ribli. **1...Nf6 2.c4 e6 3.g3 d5 4.d4** Meines Erachtens bietet dieser Zug bessere Chancen auf Eröffnungsvorteil als z.B. 4. ♗g2, worauf Schwarz 4...dxc4 mit besseren Ausgleichschancen antworten kann. **4...Be7 5.Bg2 0-0 6.0-0 dxc4** Der sogenannte klassische Aufbau. Schwarz öffnet das Spiel und nimmt den Bauern. Die Zurückeroberung des Bauern kostet Weiß Zeit, die Schwarz für die Beendigung seiner Entwicklung nutzen möchte. **7.Qc2 a6 8.Qxc4** In letzter Zeit ist die andere Variante mit 8.a4 populär. **8...b5 9.Qc2 Bb7 10.Bf4**

[10.Bg5]

[10.Bd2]

10...Nd5 Mit dem Textzug verteidigt Schwarz seinen ♙c7 und droht gleichzeitig, auf f4 zu nehmen. Der andere Springerzug ist jedoch aussichtsreicher.

[10...Nc6!? 11.Nc3 Nb4 In dieser Variante besitzt Schwarz gute Ausgleichschancen. Sein Plan ist klar: Er will nach Möglichkeit c7-c5 durchsetzen.]

11.Nc3 Nxf4 12.gxf4 Weiß hat einen Doppelbauern auf der f-Linie, beherrscht aber das Feld e5. Das schwarze Läuferpaar ist nicht von großer Bedeutung. Weiß übt zudem starken Druck im Zentrum aus. **12...Nd7 13.Rfd1 Bxf3?!** Ftacnik: Dubious exchange, the defender hopes to exploit opposite colour bishops. His problem are connected with a6-b5 pawn structure and weakness of c6 square. Dieser Zug gefällt mir nicht, weil er die Kontrolle über die weißen Felder aufgibt. Nach diesem Abtausch wird der schwarze Damenflügel spürbar schwach. Donev: Schwarz entscheidet sich für diese theoretische Fortsetzung, weil Weiß im nächsten Zug ♘e5 oder e2-e4 spielen will. Doch nach dem Textzug hat Weiß klarenVorteil. Wahrscheinlich wird die Variante mit 13... ♗f3 nach dieser Partie in Vergessenheit geraten.

1.d4 Nf6 2.c4 e6 3.Nf3 d5 4.Nc3 Be7 5.Qc2 The early queen move is nothing special in different openings after 1.d4. In the Queen's Gambit it means the investment of a vital tempo and it gives Black the chance to try pointing out its drawbacks. **5...c5 6.dxc5 d4 7.Nb5 e5!** Without the witty move 7..e5! the whole black setup would be rather pointless. The defender is ready to sacrifice some material in order to lure White's pieces on to unnatural squares.

1.d4 Sumets,Andrey Nakamura invites Svidler to play his favourite Grünfeld.
1...d5 No thank you! I will stick to the Slav. Svidler plays the same line that he played against Karjakin in round 1. **2.c4 c6 3.Nf3 Nf6 4.Nc3 dxc4 5.a4 e6** Svidler shows that the opening that he essayed in the first round against Karjakin was not just a onetrick pony. He was serious about his opening and had prepared it in depth. **6.e3 c5 7.Bxc4 Nc6 8.0-0 cxd4 9.exd4** This is definitely much more challenging than ♘xd4 which was played by Sergey Karjakin in the first round. **9...Be7 10.Qe2 0-0 11.Rd1 Nb4** Preventing the d4-d5 break. **12.Bg5** Interestingly Svidler reached this position twice in his games, once against Ivanchuk and once against Kazhgalayev. However, on both occasions he chose a different move. h6 is the modern treatment of this line making White decide where he would like to keep his bishop. **12...h6**

13.Bxf6 This is a highly concrete move. The idea is not related with the d5-break but to get the knights to menacing locations in the centre - on the e4- and e5-squares.
[Sumets,Andrey: 'White has no advantage after' 13.Bh4 Bd7 14.Ne5 Bc6 is the other critical position of the opening, and if Svidler tries this Slav line again the chances of this position arising can be quite good. 15.Bg3 Sumets,Andrey Nbd5 16.a5 Rc8 17.Bb3 a6 18.Rdc1 Bb4 19.Bh4 Qd6 20.Qd1 Bb5 21.Nxb5 axb5 22.Rxc8 Rxc8 23.Qf3 Qc7 24.h3 Ra8 25.Qd1 Bd6 1/2 (25) Ivanchuk,V (2748)-Tkachiev,V (2639) France 2010]

23.d7 It seems like Nakamura missed something here. He couldn't remember his preparation and played the most obvious move, pushing his pawn to d7. However, he could have just played ♗d3 directly which is what he thought was the move he had prepared.

26.Qh7 Sumets,Andrey: '?!' This position looks really scary if you are unprepared. However, if you know the intricacies this might well be enjoyable to play, like the current position where Black has only one good move but Peter plays it! As Svidler said after the game he had considered only two moves in this position ♗e2 and ♗c2. So ♕h7 was a

new move for him, and he found himself in a common situation where you know that the move made by your opponent is not the best, but you don't know why. Sumets,Andrey: 'After this move Black has got a better position. To secure an equal position Hikaru had to choose between 26.♗e2 and 26.♗c2.'

' **37.Nc4!** This move was not really given importance by Peter. If Black could have played his rook to c7 before ♘c4 then he would have great winning chances. 45.g4!? As always it is a decision of whether to do something in the position or just sit tight. Astrakhan FIDE GP (13) 24.05.2010
[Inarkiev,Ernesto]

The game is a good example ofl the problems of both the defence, and the technique of converting an advantage. It was played in the last round, and we didn't manage to avoid the mix of good moves and mistakes, but there are no silly mistakesl. I hope that the notes will help you to sense the tension which is there in all the Grand Prix tournaments.

1.d4 In the second half of the tournament, I had scored only 0.5 out of three games with 1.e4, so I decided to switch openings. **1...Nf6 2.c4 g6 3.g3 c6 4.Nf3 Bg7 5.Bg2 d5** During recent years, Peter has more often played this line against the Fianchetto Variation. **6.Qb3 0-0 7.0-0 Qb6 8.Nc3 Rd8** Today this move is more popular

[The main line is 8...Bf5]

9.Rd1 A rare move, but this couldn't have come as a surprise to Svidler, because I had already played it against him! **9...Bf5**

[In that game, Black already made a serious mistake here: 9...Na6? after 10.Qxb6 axb6 11.Na4!± White has a big advantage, and Black gave up the pawn in order to complicate the game dxc4 12.Nxb6 Ra7 13.Nxc4 Be6 and after some adventures Black saved the game. ...1/2 Inarkiev,E (2628)-Svidler,P (2750)/Moscow 2006/ CBM 116 (35)]

10.Ne1!? White keeps the tension in the centre. Obviously, the main difference in the positions of bpth sides is that the white pawn is on c4, and Black's one is on c6. This led White to place the pieces on more active positions. **10...dxc4!?** After about 30 minutes of thinking, Svidler finds an interesting novelty.

[In the only game, which was played in this position before, Black chose 10...Be6 and soon equalised. 11.c5 Qxb3 12.axb3 Nbd7 13.b4 a6 14.h3

h6 15.Ra3 Ne8 16.g4 Nc7= Anic Darko (FRA) 2487 - Nataf Igor-Alexandre (FRA) 2526, Vichy (France) 2000 (48)]

11.Qxc4 Na6 This position is more complicated than the endgame. White has a space advantage - the pawn on d4 is strong, but Black has a development advantage, and is ready to seize the initiative. **12.e4!** White increases the advantage in the centre.

[There's no good way to play more quietly. If 12.e3?! then e5! 13.Nf3 *(*worse is *13.dxe5 Ng4∓)* 13...exd4 14.Nxd4 Bg4↑]

12...Bg4 A very natural move. Black moves the bishop with tempo, and tries to provoke the weaknesses in White's camp. Almost everyone will play this move more or less quickly, but here it's not so simple, because different moves of the bishop lead to completely different positions. So, maybe you should try to look deeper.

[An alternative is 12...Be6!? in comparison with the game, White doesn't control the g4-square.]

13.Bf3 Defending the rook and atacking the bishop. I like this move more than others.

[There's no trouble for Black after 13.Nf3?! Qb4! *(13...e5?* doesn't work here because of *14.Nxe5!±* and Black can't take the rook *Bxd1 15.Qxf7+ Kh8* and now the nice blow *16.Bh6!+- Bxh6 17.Qxf6+ Bg7 18.Nf7+ Kg8 19.Qe6+-;* Also bad is *13...Nb4?* because ... ♘c2 is not a threat, and White can simply play *14.a3!±* and if *Nc2?* then *15.Na4+-)* Now White has to chose, to play the endgame with a slight initiative for Black, or to sacrifice the pawn for the initiative. 14.Qe2!? *(*or *14.Qxb4 Nxb4↑)* 14...Bxf3 15.Bxf3 Rxd4 16.Rxd4 Qxd4 17.Be3 Qe5 18.Rd1⩲ Two bishops give enough compensation for the pawn, but it is White who should concentrate on getting equality.]

[Less clear is 13.f3!? the position is complex, but Black has pleasant choices here. Very few players would like to play such a move without having to. Be6 14.Qa4 Nb4!? 15.Be3 Ne8 It seems, that there's no way to save the d4-pawn, but suddenly, the advantage in the number of attackers is not enough to win it. 16.Bf1! Here Black can choose according to taste; I prefer

A) The move 16...Bxd4? doesn't work because of 17.Rxd4! Rxd4 18.a3! and it's Black who will lose the material. c5 19.axb4 Rxb4 20.Qc2!?± Rxb2 21.Na4 Qb3 22.Qxb2 Qxe3+ 23.Qf2 Qxf2+ 24.Kxf2 Rc8 25.Nd3±;

B) But, Black has the very interesting sacrifice 16...Rxd4!? 17.Bxd4 Bxd4+ 18.Kg2 *(18.Kh1!?)* It seems, that Black just has a normal position anyway. For example: 18...c5 *(* More aggressive is *18...a5!? 19.a3 Bg1!* for example: *20.Kh1 Qf2 21.Bg2 b5! 22.Nxb5 cxb5 23.Qxb5 Na2!∞* and the battle is just at the beginning.*)* 19.Nc2 *(*If *19.Nb5?!* then Black can take the pawn *Bxb2! 20.Rab1 Bg7* and if *21.a3* then *Na2!∓)* 19...Nxc2 20.Qxc2 Nd6⩲ And the bishop on d4 is not weaker than the rook.;

C) 16...Nxa2!? 17.Nxa2 Bb3!

18.Qa3 Bxd1 19.Rxd1 Bxd4 and Black has good chances with rook and two pawns against two pieces 20.Rxd4!? Rxd4 21.Nc2 e5∞]

13...Be6?! Now it's just the loss of important tempo.

[The most simple and natural is 13...h5!? it's important to get the control over the g4-square, also it's a kind of prophylactic against ♗xg4-♘xg4-♕e2. Now White has different moves, but none of them can give him the advantage. For example:

A) 14.Rb1?! (**Δ**♗e3) is inaccurate: Be6! 15.d5 cxd5 16.exd5 Bf5! 17.Ra1 Ng4∓;

B) 14.Kg2 is interesting, but the pawn on h5 changes the situation Be6! 15.Qa4 *(*worse is *15.d5* here, because of *cxd5 16.exd5 Bf5!∓* and Black has the important ♘g4 all the time. For example: *17.Qe2 Nc5 18.Be3 Ng4!)* 15...Ng4!? 16.Nc2 c5 17.d5 Bd7 18.Qb3∞ White keeps the centre, but Black's pieces are active enough.;

C) White can also develop the bishop on f4 14.Bf4!? for example: Be6!? 15.d5 cxd5 16.exd5 Bg4!∞ The pawn on h5 helps again.;

D) 14.Be3 Bxf3 15.Nxf3 Ng4∞ Black will take the bishop, but this will strengthen White's pawns in the centre.]

[Less clear but strong enough is 13...Bh3 (**Δ** ♘g4). Now, again White has to give up something to finish development. 14.Bf4!? *(14.e5?!* only weakens the centre: *Be6! 15.Qe2 Nd5∓ 16.Bg5 Nac7;* Possible is *14.Na4 Qb4 15.Qxb4 Nxb4 16.Nc3 Ng4* It seems, that White is in trouble, but actually not *17.a3! Na6 18.Nc2* and White protects the centre, but Black has good play *e5 19.d5 Nc5∞;* White also can try to take more space with *14.a4!? Qb4 15.Qxb4 Nxb4 16.a5∞)* 14...Ng4 15.Qe2 h5! 16.d5∞ A necessity, which lets White hold the control over the centre, but obviously Black is OK.]

14.d5! Now, Black is in trouble. It's already not easy to defend, but the task is twice as hard when you realise that just one move before you had an unclear position. **14...Bg4?!** Of course, normally, Black would like to determine the position in the centre, but here it looks dangerous. Still, it was necessary to calculate it

[After 14...cxd5! 15.exd5 Bf5 16.Qe2 the position is unpleasant, but Black has a concrete way to keep his pieces on normal positions. Nc5! 17.Be3 Qa5! and the position is just slightly better for White. 18.Bd4 *(*If *18.Rd4* then *Qa6!±;* Or *18.Rac1 Rac8!?±)* 18...Rac8±]

15.Bxg4?! This is not precise enough, and lets Black construct a defence.

[The natural 15.Be3! is very strong. The critical move here is

A) 15...Qb4? Simply loses the pawn. 16.Qxb4 Nxb4 17.Bxg4 Nxg4 18.Bc5±;

B) The story is similar after 15...Qa5? 16.dxc6± bxc6 17.Rxd8+ Rxd8 18.Qxc6±;

C) 15...Qc7? doesn't help either: 16.dxc6 Bxf3 17.Nxf3 Qxc6 18.Rxd8+! Rxd8 19.Qxc6 bxc6 20.Bxa7±;

D) The only way not lose the

material immediately is 15...c5 but after this move White has a big advantage in the centre. For example: 16.e5!?± *(Also strong is 16.Qe2!? Bxf3 17.Nxf3±)* 16...Bxf3 17.Nxf3 Nd7 18.e6!? *(*Also possible is *18.Bf4!? Qxb2 19.Rab1 Nb6 20.Rxb2 Nxc4 21.Rxb7±)* 18...Qxb2 19.exf7+ Kh8 20.Rac1± The knight will come to e6 very quickly.;

E) 15...Qxb2!? Maybe this is not the best move, but in other lines White can get an advantage without too much tension. 16.Rab1 Qa3 It's important, that White has the very strong

E1) Less clear is 17.Rxb7 cxd5 18.Nxd5 Nxd5 19.Rxd5 Rdc8± For example: 20.Qb3! *(* The advantage is dwindling after *20.Qd3?! Qxd3 21.Rxd3 Be6 22.Rxe7 Nc5⇄;* Or after *20.Nc2?! Rxc4! 21.Nxa3 Bxf3 22.Nxc4 Bxe4 23.Rdd7 Bxb7 24.Rxb7 Bf6±* And Black should hold the position.*)* 20...Qxb3 21.axb3 Be6 22.Rdb5± Here White has serious chances, but Black can defend.;

E2) 17.dxc6! bxc6 18.e5!± Exploiting the lack of coordination in the black army; now Black is very close to catastrophe. With the queen on a3 and the knight on a6, the tactic should work for White.

E2a) 18...Bxf3 just loses: 19.Rxd8+! Rxd8 20.exf6 Bxf6 21.Nxf3 Bxc3 22.Rb3+-;

E2b) More complicated, but also bad is 18...Be6 19.Qxc6 Nd7 *(*If *19...Rdc8* then suddenly *20.Nc2!+- Qa5 21.Rb5 Qxc3 22.Qxc3 Rxc3 23.Bxa8+- Ng4 24.Rd8+)* 20.Nc2! This is an important resource Nxe5 *(*or *20...Qa5 21.Rb5+-)* 21.Nxa3 Nxc6 22.Bxc6 Bxc3 23.Bxa8+- Rxa8 24.Nb5 Bf6 25.a3!?+-;

E2c) 18...Nd5 White wins the pawn, and also has the initiative. 19.Nxd5 Bxf3 20.Nxe7+! Qxe7 21.Nxf3 Nc7 22.Qxc6±]

15...Nxg4 **16.Qe2** The queen comes to a more comfortable position. **16...Ne5**

[Here another interesting move is 16...h5!? 17.Bg5 Bf6 18.Nf3±]

17.Bg5± White has got a comfortable advantage - more space in the centre, and Black doesn't have active counterplay. White's main threat is ♗e3 and after that f2-f4. The goal of the last move is by attacking the e7-pawn, to force Black to worsen the position, and, only after that, come back to the main plan.

[The immediate 17.Be3!? is also possible Qb4 18.Rd4 Qb6 19.Rad1±]

17...Qc5

[On 17...Re8 White will play 18.Be3±]

18.Rac1 Exploiting the problem underlying the last black move.

[Here Black was prepared for 18.Be3 Qc4!∞]

18...Re8

[18...h6?! doesn't work: 19.dxc6! Qxc6 *(*Of course not *19...hxg5? 20.cxb7+-;* If *19...Nxc6* then *20.Nd5±)* 20.Bxe7± White simply wins the pawn. Rxd1 21.Rxd1 Nc4 22.Rc1 Qe6 23.Nb5!±]

19.dxc6 I decided to simplify the position,

and to fix my edge. Probably, White can count on a bigger advantage than in the game.

[Weaker is 19.Be3?! Qc4±]

[But White can do one more preparatory move 19.a3! Qc4 Necessity *(*If *19...Qa5* then *20.Be3±* (Δ f4).*;* Also bad is *19...h6? 20.dxc6! Qxc6 21.Nd5 Qe6 22.Be3!* and Black is in big trouble. *Nc6 23.b4!+-)* 20.f4 Qxe2 *(*But *20...f6?* doesn't work: *21.fxe5 Qxe2 22.Nxe2 fxg5 23.dxc6 bxc6 24.Rxc6 Nb8 25.Rc5+-* White is a pawn up in a much better position.*)* 21.Nxe2 Ng4 22.dxc6

A) Or 22...Bxb2 23.cxb7! Bxc1 *(* If *23...Rab8?* then *24.Rc6+-)* 24.bxa8Q Be3+ 25.Kg2 Rxa8 26.Bxe7±;

B) 22...bxc6 23.Rxc6 Nb8 24.Rc5 Bxb2 25.Rd3± With a big advantage, because almost every black piece is in an awkward position.]

19...Nxc6 20.Rd5 This is the point; White starts the pursuit of the queen.

[The alternative is less clear: 20.Nd5 Qa5 21.a3 for example: h6!? 22.Be3 e6! 23.b4 Qxa3 24.b5 exd5 25.bxa6 Na5!? 26.Rxd5± White still has a solid advantage, but a lot of exchanges have increased Black's chances of a draw.]

20...Qb6

[20...Qb4 Just losing the tempo, after 21.Nd3± Black will anyway have to play Qb6]

21.Be3! Forcing the black queen to hide in the corner of the board. **21...Qc7**

22.Nb5 Qb8

[22...Qc8 Losing the pawn 23.Nxa7! Qe6 24.Nxc6 bxc6 25.Ra5±]

23.Nd3 This is the position, which I wanted when was playing 19.dxc6. White is clearly better: the rook on a8 and knight on a6 are just terrible. At the same time, White's pieces are quite active but Black hasn't any weaknesses and that is why White can't get something concrete immediately.

23...Rd8 Peter played the next part of the game very well; in a dangerous position, he managed to find the moves which maintained the tension.

[If Black tries to exchange pieces 23...Nc7 then White will destroy Black's structure 24.Nxc7 Qxc7 25.Nb4!±]

24.a3 There's no direct way, so White should impede Black in the activation of his pieces. In the next part of the game, we both were under time pressure, I had about 15 minutes till the time control, my opponent had about 25 minutes, which is not too much, because in the Grand Prix series there's no increment after each move. **24...e6 25.Rxd8+** I played this and the next few moves quite quickly.

[The computer suggests an interesting option 25.Bf4!? White wants to get something from the exchange of the rooks, because Black needs this exchange. Qc8 *(*Worse is *25...e5 26.Bg5±)* 26.Rd6!± This is the point, if Black takes on d6, knight will come to d6, and it's obvious, that this will improve White's position. But what if Bf8 ? Here White has a nice tactic 27.Ne5! destroying Black's position, because if Bxd6 then 28.Nxc6! bxc6 29.Nxd6± Of course, to play or even just to think about this, you need time.]

25...Qxd8 26.b4± The exchange of the rooks, doesn't change the situation too

much, because the rook d8 was not the bad piece in Black's camp, but it's in Black's favour for sure. **26...Qe7 27.Kg2** The advantage of this move is, that you can play it quickly. At the same time, it's not clear, how White should exploit his advantage. **27...Nab8!** Black decides not to wait till White starts the assault, and tries to improve the position. **28.e5!** It's important to achieve something, before Black coordinates his forces.

[White still can't organize an invasion: 28.Rd1 Nd7 29.Nc5 Nf8±]

28...Nd7 Peter spent half of his time on this move, and after it we both had about 10 minutes left. Obviously, Black would like to use some tactics to make the defence easier, but that moment hasn't come yet. Let's check, what can Black try.

[The most simple is 28...Nxe5? 29.Rc8++-]

[Or 28...Bxe5? 29.Nxe5 Nxe5 30.Rc8+ Kg7 31.Bd4+-]

[During the game, I was thinking about the 28...Qd7 (Δ ♕d5). 29.Nd6! is critical *(29.Nc5* is also possible *Qe7 30.f4±* but Black still can fight. *a5)* 29...Bxe5 This was the point of the previous move, but this weakens the black king, and after 30.Nxe5 Qxd6 31.Ng4!+- Black is defenceless.]

[The real alternative is 28...a5 but this suddenly helps White, because now White will have clear objects to attack. 29.Nd6! axb4 30.axb4 Nd7 *(*Once more *30...Bxe5?* is bad; now White has *31.Nc8! Qc7 32.Nxe5! Qxe5 33.b5*+- and Black loses the piece. *Nd4 34.Ne7+)* 31.f4+- The threat b4-b5 is very strong. f6 32.b5 Now we can feel the danger of the position, and how it's unpleasant for Black.]

29.f4 f6! Black can't ignore the pawn on e5, because it's like a Trojan Horse which will help White to come into the city. **30.exf6**

[The interesting alternative is 30.Bc5!? Nxc5 31.exf6! Bxf6 32.Nxc5 This is the point, White starts the attack of the Black weaknesses immediately. The question is, what if a6 *(* Black can't protect the pawn *32...Re8 33.Qe4*+- (Δ♘ b7) *;* Maybe the best chance is *32...Nd4!? 33.Nxd4 Bxd4±* but White has a pleasant choice as to how to take the pawn. *)* The key move is 33.Nxb7! and White wins the pawn, and the pawn on e6 is still weak. axb5 *(* If *33...Qd7* then *34.Rd1!*+- *)* 34.Rxc6+-]

30...Nxf6 31.Nd4?! Besides the better structure, White has a serious initiative, but White must try to use it before Black develops the rook. The text move, helps Black.

[It was necessary to find 31.Bc5!

A) Probably better is 31...Qf7 but here White has a good choice. 32.Re1± *(*also *32.Nd6!?;* or even *32.Bxa7!?)*;

B) 31...Qd7 and now 32.Bd6!± (Δ ♘c5, Δ ♘e5) , and White has dangerous threats. For example: Re8 33.Ne5 Nxe5 34.Rc7 Qd8 35.Bxe5±]

31...Nxd4 32.Bxd4 Of course, White still has a serious advantage, but at least, all the black pieces will be in the game soon. **32...Qd7 33.Bb2 b6**

[33...Qd5+ doesn't change much: 34.Kg1 Re8 for example: 35.Nf2 Re7 36.Rd1 Qc6 37.Bd4! a6 38.Qb2 Rf7 39.Be5±]

34.Kg1?! Once again, White doesn't try to seize the initiative.
[White could start the attack immediately 34.Ne5! Qd5+ 35.Kh3!± (Δ ♖c7). For example: a5 36.b5! Rd8 37.Rc7±]
34...Rd8 Here we both had about 5 minutes.
[If 34...Rc8 then 35.Rd1! the exchange of the rooks is in Black's favour.]
35.Re1?! The rook is well placed on the c-file.
[⌓35.Nf2!]
35...Ne8! Black exchanges one more piece. **36.Nf2** White should be accurate to avoid further simplifications.
[For example: 36.Bxg7 Qxd3! 37.Bb2 Qxe2 38.Rxe2 Kf7±]
[Or 36.Ne5 Qd2!± 37.Nc6 Qxe2 38.Rxe2 Rd1+ 39.Kf2 Bxb2 40.Rxb2 Rh1 41.Kg2 Ra1±]
36...Bxb2 37.Qxb2 Kf7 38.Ne4 Actually this is again an inaccuracy, but this move provoke Black into a weakness, which finally helped White to destroy Black's position.
[⌓38.Rd1 Qe7 39.Nd3±]
38...h6 Black can't avoid this move.
39.Nf2 Nf6 The lost of tempi gave Black time to consolidate his position, and the activity of his pieces should be enough to cover the kingside. But on the last move before time control we both had 1 minute. **40.Qe2 Qd6?** A serious mistake. Peter had worked hard and almost equalised, but after this move Black comes back to an unpleasant position again; but the mistake is avery likely one to make when you are in time trouble.
[Black shouldn't give White time to attack the kingside, and here was the right moment to start counterplay 40...Rc8! suddenly, Black's pieces become very active. 41.Rd1 *(Or 41.Qe3 Rc2 42.Qb3 Rd2∞* and Black is no worse.*; If 41.Nd3* then Black has at least a repetition *Qd4+ 42.Kf1 Qd5=)* 41...Qa4 this is more direct move *(* not worse is *41...Qc6∞ 42.Nd3 Qc3)* 42.Rd3 *(* White can sacrifice the pawn *42.Nd3!? Qxa3∞* but here the play will continue wit all three results possible. *)* 42...Rc1+! 43.Kg2 Rc2 44.Qf3 Nd5∞ and Black has enough counterplay.]
41.Rd1! Now White seizes the initiative, and didn't let it go till the end of the game. The final part of this game was my part. **41...Nd5?!** Black doesn't want to go into the deep defence, but the knight on f6 was protecting important squares. After the game, Peter said, that he chose this move, because he didn't like the others.
[More stubborn is 41...Qe7 42.Nd3 Kg7 but Black has to be ready for hard defence. 43.Rc1! *(* The exchange of the rooks is again in Black's favour *43.Ne5?! Rxd1+ 44.Qxd1 Nd5±)* 43...Nd5 44.Ne5±]
42.Qb2! (Δ ♘g4). This move is strong.
[But stronger is 42.Qe4! (Δ ♘g4-e5) , and Black loses the pawn. The queen on e4 is incredibly strong, White is threatening all Black's weaknesses - e6, h6, g6. Qc7 *(*or *42...Qf8 43.Ng4+-)* 43.Ng4! Kg7 *(*If *43...Ne7* then *44.Re1!+-)* 44.Qxe6 and White is winning. h5 45.Qe5+ Qxe5 46.Nxe5+-]
42...Qf8 The only way to save the material. **43.Ng4 Qg7 44.Qc2!** This is necessary to attack all the

weaknesses; the queen comes to the right square.

[Worse is 44.Ne5+ because after this, it's more difficult to attack the e6-pawn. Kg8 45.Qc2 Kh7±]

44...Kg8 45.Qe4! The best position for the queen.

[Worse is 45.Qc6?! because of Qe7! 46.Re1 *(46.Nxh6+?!* is not the win of the pawn *Kh7 47.Ng4 Nxb4!±)* 46...Rd6± and Black continues the resistance.]

45...Rd6□

[Of course not 45...Re8? 46.Rxd5!+-]

46.Ne5 Kh7□

[If 46...g5 then 47.Nc4!+- Rc6 48.Rxd5]

Now, when Black's pieces are forced to defend the kingside, White can prepare the invasion on the queenside. Black can't avoid it. **47.Rc1! Qf6 48.Rc8 Qf5 49.Qe1!** The queen is going to the long diagonal, but what is very important, is that White controls all the squares, and doesn't give Black any counterplay.

[There are a lot of ways to spoil everything. For example: 49.Qd4? White wants to attack immediately, but after Qb1+ 50.Kg2 g5! White would have to be accurate to equalise. The most simple is 51.fxg5 hxg5 52.Rc7+ Kg8 53.Rc8+ Kh7 54.Rc7+=]

[Also 49.Qxf5?! would be an inaccuracy: exf5 50.Ra8 White still has a serious advantage, but Black has real chances to save the game. g5! 51.Rxa7+ Kg8 52.fxg5 hxg5±]

49...b5 Actually, the position is almost lost for Black, now it's just a question of practical chances.

[Black can provoke the crisis immediately 49...g5 50.Qa1! (Δ ♖h8).

A) If 50...gxf4 then 51.Nc4+- and White wins fxg3 52.Rh8+ Kg6 53.Rg8+ Kh5 54.hxg3+-;

B) It's late to defend 50...Qf6 51.Ra8! gxf4 *(or 51...Ne3 52.Qc3!+- Rd1+ 53.Kf2)* 52.Rxa7+ Kg8 and now 53.Rf7! Qg5 54.Qb1 Nf6 55.Qc2! Rd8 56.Nf3+-;

C) 50...Qe4 51.Ng4! looking to h8. e5□ 52.Qxe5 Qxe5 53.fxe5 Re6 54.Rd8 the endgame is winning for White. h5 *(If 54...Nc3 then 55.Rd6+-)* 55.Rxd5 hxg4 56.Kf2! Rh6 57.Kg2 Re6 58.h3+-]

50.Qa1

[50.Qc1 also wins.]

50...g5?! This loses immediately, but the position is bad anyway.

[If 50...Qf6 then White attacks the queenside 51.Qf1! Qf5 *(or 51...a6 52.Qf2+-)* 52.Qxb5 Qb1+ 53.Qf1 Qb2 54.Qf2+- and White wins, because if Black takes the pawn, then the kingside falls Qxa3 55.Qc2! and checks don't help Qa1+ 56.Kf2 Qd4+ 57.Ke2! Qe3+ 58.Kf1+-]

[Probably, the best chance is 50...Ra6!? now the rook is far away from possible attacks of the knight, and White still must to find good moves to win the game. 51.Rd8! Qc2 52.Nxg6! Nc3 53.Ne5+- The position is sharp, and full of interesting variations, but White is winning in all lines, of course during the game there's still a lot of work to do.]

51.Nc4! The most accurate.

[Also wins 51.Rh8+ Kxh8 *(or 51...Kg7 52.Nc4++-)* 52.Nf7+ Kh7 53.Qh8+ Kg6 54.Ne5+ Qxe5 *(If 54...Kh5 then 55.Qe8++-)* 55.Qxe5+-]

51...bxc4 52.Qh8+ Kg6 53.Rg8+ Kh5

54.Rxg5+!+- This is the point, now it's all over. **54...Qxg5 55.fxg5 c3 56.Qxh6+ Kg4 57.g6 e5+- 58.g7** Black resigned. **1-0**

1.e4 c6 2.d4 d5 Die Caro-Kann-Verteidigung sieht heutzutage wie eine uneinnehmbare Festung aus. Zusammen mit der Russischen Partie sind das die zwei Eröffnungen, die den Weißspielern die meisten Probleme stellen. Doch im Vergleich zu Russisch erlaubt Caro-Kann eher auf einen Konter zu spielen. **3.e5!** Das ist streng der einzige Weg, auf einen Eröffnungsvorteil zu spielen. Die Hauptvarianten sind ausanalysiert und bringen Weiß nichts.
[3.Nc3 Die "klassische Hauptvariante". dxe4 4.Nxe4 Bf5 5.Ng3 Bg6 6.h4 h6 7.Nf3 Nd7 8.h5 Bh7 9.Bd3 Bxd3 10.Qxd3 e6 11.Bf4 Qa5+ 12.Bd2 Bb4 13.c3 Be7= Die Erfahrungen der letzten Jahre haben gezeigt, dass diese Stellung, die fast forciert aufs Brett kommt, ausgeglichen ist.]
[3.exd5 cxd5 4.c4 Der Panov Angriff. Nf6 5.Nc3 e6 6.Nf3 Bb4 führt ebenfalls zu Stellungen mit gleichen Chancen für beide Seiten.]
3...Bf5 Nun hat Weiß eine Menge an spielbaren Varianten.
[Eine Alternative ist 3...c5 , wonach Weiß zu einem kleinen Vorteil kommen kann. 4.dxc5 Nc6 5.Nf3 Bg4 *(5...e6 6.Be3 Nge7 7.c3 Nf5 8.Bd4 Bd7 9.Qd2 a5 10.Be2 a4 11.0-0 Qa5 12.Bd3 Nfxd4 13.cxd4 Qxd2 14.Nbxd2±* Socko - Dziuba (Lubniewice, 2005)) 6.Bb5 Qa5+ 7.Nc3 e6 8.Be3 Nge7 9.a3 a6 10.b4 Qc7 11.0-0 Bxf3 *(11...axb5*

[4.c4 e6 5.Nc3 Ne7 6.a3 dxc4 7.Bxc4 Nd7⇄ Weiß hat das Feld d5 aufgegeben, hat dafür jedoch einen Raumvorteil. Die Stellung ist gut spielbar für beide Seiten.]

4...e6 5.Be2 In der heutigen Praxis ist das die Hauptvariante. **5...h6**

[5...c5! 0-1 Svidler,P (2727)-Topalov, V (2791) Nanjing Pearl Spring 2008 (9) Meiner Meinung nach ist das die Fortsetzung, die zum Ausgleich führt.]

6.0-0 Ne7 7.b3 Weiß will c4 spielen, und dabei die Gelegenheit haben, auf c4 mit dem Bauern b3 zu nehmen, so dass das Feld d5 nicht aufgegeben wird.

[7.Nbd2 ist ein anderer möglicher Plan. Nd7 8.Nb3 Bh7∞ führt zu unklaren Stellungen mit komplexem, chancenreichem Spiel.]

7...c5! Wohl die beste Reaktion - man sollte Weiß nicht kostenlos zu c4 kommen lassen. **8.Ba3?!N** Eine verdächtige Neuerung. Schon nach wenigen Zügen kommt Schwarz zu gutem Spiel. Das übliche 8.c4 wäre gut gewesen.

[Svidler,Peter]

The tournament situation before the last round - Gukesh half a point behind Mishra and me, with Mishra playing his mentor, Boris Gelfand - dictated my opponent will want as sharp of a game as possible. He seemed to favour 1.e4 earlier in the tournament, but as is the case with most of the new crop of superstars, I knew he was capable of playing pretty much anything, and to a very good standard. Die Turniersituation vor der letzten Runde - Gukesh lag einen halben Punkt hinter Mishra und mir, während Mishra gegen seinen Mentor Boris Gelfand spielte - diktierte, dass mein Gegner eine möglichst scharfe Partie spielen wollte. Zu Beginn des Turniers schien er 1.e4 zu bevorzugen, aber wie es bei den meisten neuen Superstars der Fall ist, wusste ich, dass er in der Lage ist, so ziemlich alles zu spielen, und das auf einem sehr guten Niveau. **1.d4 Nf6 2.c4 g6 3.f3** A very natural choice, since I've been struggling against this line for a while now. You would have thought that is reason enough for me to repeat it before important games, but well, you would be wrong. Eine ganz natürliche Wahl, da ich schon seit einiger Zeit mit dieser Variante zu kämpfen habe. Man könnte meinen, das sei Grund genug für mich, sie vor wichtigen Partien zu wiederholen, aber naja, das wäre ein Irrtum. **3...Nc6** I still believe my choice for the course, 3...d5, is fine - but it's not an easy line to play when you haven't refreshed it in a while, especially against a very well booked up player. 3...Nc6 has been my stand in in recent years, but without much success. Ich glaube immer noch, dass meine Wahl für den Kurs, 3...d5, in Ordnung ist - aber es ist keine einfache Variante, wenn man sie eine Weile nicht aufgefrischt hat, besonders gegen einen sehr guten Buchspieler. 3...Sc6 habe ich in den letzten Jahren immer wieder gespielt, allerdings ohne großen Erfolg. **4.d5 Ne5 5.e4 d6 6.Nc3 Bg7** I tried 6...c6 here vs Ding Liren, but failed to equalize. Black's normal response involves allowing e6 dxe6 fxe6, but my own experiences in that structure, and further attempts to analyze it, convinced me I don't much like it for Black. Therefore, I was very much looking for ways to prepare e6 which would allow Black to recapture with a piece beantwortete. The text move is not great, but it does have its merits, and in fact, to my great surprise, it's only 'refuted' by a very subtle reply - all the normal-looking moves actually do give Black a decent game. Black's plan is very simple - I want to play e6 next, and attack the White center directly. Der Textzug ist nicht großartig, aber er hat seine Vorzüge, und tatsächlich wird er zu meiner großen Überraschung nur durch eine sehr subtile Antwort 'widerlegt' - alle normal aussehenden Züge geben Schwarz tatsächlich ein anständiges Spiel. 14...f5 15.0-0-0 An important moment in the game. We both had about half an hour left at this point, and I felt like I couldn't really invest much of it into any single decision. My original intention was to insta-recapture on e4 here, but then, somewhere along the line while Gukesh was thinking, I spotted that the move I made existed - and I simply couldn't resist. It's nothing special objectively, in terms of both quality and beauty, but it somehow appealed to me a great deal - it's not that often you can take a full knight but instead make a move that allows your opponent to trade it away while also unpinning his other endangered pieces. Ein wichtiger Moment in dieser Partie. Zu diesem Zeitpunkt hatten wir beide noch etwa eine halbe Stunde Zeit, und ich hatte das Gefühl, dass ich nicht wirklich viel davon in eine einzelne Entscheidung investieren konnte. Ursprünglich wollte ich hier sofort auf e4 schlagen, aber dann sah ich irgendwann, während Gukesh nachdachte, dass der Zug, den ich machte, existierte - und ich konnte einfach nicht widerstehen. Er ist objektiv gesehen nichts Besonderes, sowohl in Bezug auf die Qualität als auch auf die Schönheit, aber er hat mich irgendwie sehr angesprochen - es kommt nicht oft vor, dass man einen vollen Springer nehmen kann, aber stattdessen einen Zug macht, der es dem Gegner erlaubt, ihn abzutauschen und gleichzeitig seine anderen gefährdeten Figuren zu entfesseln. **15...Nc5**

Armed with that knowledge, and with a bit more time on the clock, I felt like I must push. In the real world, this position is just equal. The engine holds it without a single problem, and I suspect even a human won't suffer too much. Black just can't break through, mainly because just

how useless the Be6 is. Der Staub hat sich gelegt, Schwarz hat einen Mehrbauern und eine sichere Struktur, und Weiß hat anscheinend überhaupt kein Gegenspiel. Mit diesem Wissen und etwas mehr Zeit auf der Uhr hatte ich das Gefühl, dass ich Druck machen muss. In der realen Welt ist diese Stellung einfach ausgeglichen. FIDE World Cup (5.1) 03.12.2009
[Rogozenco,Dorian]

The World Cup 2009 was one of the most successful tournaments in Malakhov's career. His outstanding result with the Black pieces in the Chebanenko Slav contributed enormously to this performance. Malakhov's idea in the Chebanenko Slav of not being bothered about getting slightly passive positions proved to be very effective in Khanty Mansiysk. In their wish to take advantage of the white pieces his opponents often crossed the line when trying to break through Black's solid bastions. At those moments Malakhov made full use of his chances, pointing out the weaknesses in opponent's positions. In the present encounter Svidler was aiming for a sharp game and had prepared a novelty in order to get a new and fresh position. The passivity would have led to unpleasant play for Black, therefore Malakhov reacted in a very active way at an early stage, which resulted in a highly tense battle which had already started on move 10. Svidler's determined play led to a strong initiative on the kingside for White. However, Malakhov kept his cool and in the end it was White who collapsed under the pressure. **1.d4 d5 2.c4 c6 3.Nc3 Nf6 4.Nf3 a6 5.e3 b5 6.c5 g6 7.Bd3 Bg4** After the exchange of the bishop for the knight White gets an edge, but in the resulting positions it is generally difficult to make further progress. In the event of the much more popular 7... ♗g7 White can consider 8.h3, preventing simplifications in a position in which he has a space advantage. **8.h3 Bxf3 9.Qxf3**
[Malakhov seems to be fond of the pawn structure arising after 9.gxf3 Nbd7 10.f4 which represents an important alternative for White.]
9...Bg7 10.g4!?N An interesting and somewhat provocative novelty. White prepares the optimal arrangement of pieces - ♕g3 and f2-f4.
[10.Qg3 Nbd7 11.f4 e6 12.Bd2 h5!? 13.0-0 h4 14.Qf3 Nh5 15.Ne2 a5 16.e4 f5 17.e5 Bf8 18.Kh2 Be7 19.g4 hxg3+ 20.Nxg3 Nxg3 21.Qxg3 Rh6 22.Rf3 Bh4 23.Qg2 Nf8 24.Be1 Bxe1 25.Rxe1 Ra7 26.Rg1 Rah7 27.Bf1 Rh4 28.Qd2 Ra7 ½-½ Marcelin,C (2481)-Prie,E (2507)/ Besancon 2006]
10...e5 This standard advance is the most natural reaction to White's kingside actions. Now the position becomes very sharp.
[10...Nbd7 11.Qg3 0-0 12.f4±]
11.Qg3
[11.dxe5? Nfd7∓]
11...Nfd7
[In the event of 11...e4 12.Bc2

White will decide the moment when to open up the centre with f2-f3.]

12.Ne2 Qe7 13.0-0 h5

[Less committal and therefore more cautious is 13...0-0 14.a4 b4 15.Bd2 a5∞]

14.f3 Ruling out Black's possibility to close the centre with e5-e4. Now White will himself prepare the advance e3-e4 in order to open the position quickly, trying to exploit of his lead in development and the bishop pair.

[The immediate 14.a4 b4 15.Bd2 a5 16.e4 is too early: dxe4 17.Bxe4 hxg4 18.hxg4 exd4 19.Bg2 *(19.Rae1? Qxe4 20.f3 Be5 21.Nf4 Qc2-+)* 19...Nxc5∓]

14...Nf8 Another standard manoeuvre in such pawn formations - the knight goes to e6 where it will point out the weakest point of White's structure: the pawn on d4. On the other hand Black remains with development problems and the knight retreat helps White to open the centre quickly.

[14...a5 15.Bd2 Na6 deserved attention, since the a5-pawn is not hanging: 16.Bxa5? Naxc5 △17.Bb4 exd4 18.exd4 Qe3+-+]

15.a4! Winning a tempo for development. **15...b4 16.Bd2 a5 17.e4! dxe4 18.Bxe4 Ne6!**

[18...exd4 19.Bf4↑ is much too dangerous.]

19.Rae1 h4

[Another option was 19...hxg4!? Δ 20...0-0.]

20.Qf2 0-0 21.f4 Very energetic play by Svidler. **21...exd4**

[Again Black had a reasonable alternative: 21...exf4

A) 22.Bb1!? Na6!∞ *(22...g5 23.Nxf4! gxf4 24.Bxf4⩲)*;

B) 22.Bxf4 Nxc5! 23.dxc5 Qxe4 24.Bd6 Na6 25.Bxf8 Rxf8 and with a pawn and strong bishop Black has compensation for the exchange, since White's structure is weak and the king quite exposed.]

22.f5 This logical desire to continue active actions without wasting time allows Black to get counterplay.

[After 22.Nc1 (bringing the knight to d3 or b3) Black has no time to take the pawn c5 and White's prospects are clearly preferable. Nxc5 *(22...Qxc5 23.f5→)* 23.Bxc6]

22...Nxc5 23.Bb1 d3! 24.Nc1

[24.Nf4 Qd6 25.Be3 *(25.fxg6 fxg6 26.Ba2+ b3-+)* 25...Ne4 26.Qf3 Ng3 27.Rf2 Nd7 28.Nxd3 Rae8∓]

24...Qd6 25.Ba2? A blunder, losing material.

[It is understandable that Svidler rejected 25.f6 Bxf6 26.Qxf6 Qg3+ 27.Kh1 Qxh3+ 28.Kg1 Qxg4+ 29.Kh2 *(29.Kh1?! Ne4)* 29...Qg3+ 30.Kh1 when Black is left with a pleasant choice between forcing a draw, or continuing to play on with Nbd7∓]

[But 25.Qxh4! would have kept the result of the game entirely open. The concrete analysis shows that White is hardly worse:

A) 25...g5? 26.Bxg5 *(26.Qxg5?! Qg3+)* 26...Bxb2 *(26...d2? 27.f6+-)* 27.Nxd3! Nxd3 *(27...Bd4+ 28.Kg2+-)* 28.f6 Nd7 *(28...c5 29.Qh6* with mate *)* 29.Rf3+-;

D) 25...Bd4+ 26.Kg2

D1) 26...Qd5+ 27.Rf3 Nbd7 28.Ba2! *(28.Nxd3 Nxd3 29.Bxd3 Rae8!↑)* 28...b3 *(28...Bf6 29.g5+-)* 29.Nxb3 Nxb3 30.Bxb3 Qxb3 31.fxg6 fxg6 32.Re7 Nf6 33.Rxf6 *(* or even *33.Qh6 Rf7 34.Qxg6+ Kf8 35.Re2!* must win *)* 33...Qd5+ 34.Kh2 Qe5+ 35.Rf4! *(35.Rxe5 Bxe5+ 36.Kg2 Rxf6∞)* 35...Rxf4 36.Qh7+ Kf8 37.Rxe5 Bxe5 38.Qh6+ Kf7 39.Bxf4+-;

One possible fantastic variation is 28.Qg5 b3 29.fxg6 bxa2 30.gxf7+ Kh8 31.Rf3!? in order to prevent the check from d5. *(31.Rf5* might be even better*)* and if 31...a1Q then 32.Re8!! 28.Qh5 d2 29.f6 Qxf6!

[Again it was easy to go wrong: 29...Bxf6? 30.Bxd2! Nxd2? 31.Qg6+±]

30.Bxd4 Qxd4+ 31.Kg2 dxe1N+ The most elegant solution.

[White gets mated: 31...dxe1N+ 32.Kh2 *(32.Rxe1 Qf2+ 33.Kh1 Ng3#; 32.Kh1 Ng3+ 33.Kh2 Nxf1+ 34.Kh1 Ng3+ 35.Kh2 Qf2#)* 32...Qd2+ 33.Kg1 Qg2#]

RUS-ch Superfinal 61st (11) 15.10.2008

[Stohl,Igor]

WIth this last-round win Peter Svidler managed to catch up with his opponent, thus forcing a rapid play-off - which brought him his 5th Russian champion title. **1.e4 c6 2.d4 d5** Playing for a win with Black against a strong opponent requires a psychlogically astute opening choice. The course of the game justified Svidler's Caro-Kann - Alekseev usually plays the Advance Variation, in itself a dangerous fighting weapon, but it's not so simple even for White to fully release the tension. **3.e5 Bf5 4.Nf3 e6 5.Be2 Nd7 6.0-0 Bg6** Black indicates he wants to keep his ♗;, moreover Alekseev has not faced this move before.

[The more often played 6...Ne7 7.Nh4 is not to everyone's taste.]

11...Bb7 covering the long diagonal. Now White has to move the queen from d4.

[11...c5 is already met by 12.Qe4]

12.Qg4

[12.c4!? seems as one of the most logical continuations. bxc4 13.Qxc4 d5 14.exd6 Nxd6 15.Qg4 and White's position is slightly better, thanks to a superior pawn structure: Bf6 16.Nc3 Re8 17.Bf4± 1-0 Arakhamia,K-Hebden,M/ch-GBR, Scarborough ENG 2004 (50)]

12...Nd7 34:27 **13.Qb3** 16:57 This looks like a good moment to develop the queen, since Black cannot consolidate the d5-square with ... ♖d8 anymore. [17...Qa3 turned out well for Black in the only game reaching this position. White faces the problem of the hanging a2-pawn.

A) 18.Rc2 does not achieve much due to Be4 19.Rc1 Bd5;

I must confess that prior to annotating this game I knew Black had a good half a dozen alternatives after 5.0-0, but was not familiar with the last move at all! In fact, it has been played in a few hundred games starting with 1887! So maybe I should reformulate: chess may be limited, in this game there is nothing really new, but our even more limited knowledge makes it seem infinite. **6.d4** 15 The most ambitious move. White opens the centre and hopes to prove the queen's development premature by attacking it as soon as possible. But the game will show that the queen has enough mobility, due to the absence of the white light-squared bishop and the space cleared by ...dxc6 and ...exd4.
[6.d3 allows Black to achieve a comfortable regrouping: Ne7 *(6...Bg4 7.Nbd2 Ne7 8.h3 h5* would actually transpose to the 5... ♗g4 variation. 6...exd4 2 **7.Bg5** 15
[The oldest recorded game with this line went 7.e5?! It makes no sense to weaken the light squares. This actually transposes to some sort of Berlin Defence in which Black has not lost the right to castle, sparing him quite a bunch of tempi on the way to connect rooks. 9.Nc3 1:40 **Be7** 2:42 The exchange of bishops tends to be a small strategic success for White in the Exchange Variation. Things are a bit different here, as this operation ensures the queen higher stability.

[Without queens, the best way to prepare long castling would be 9...f6 but here this may cause some problems after 10.Bh4 0-0-0 11.Bg3 with advance in development and continuing initiative for White.]

11...0-0-0 3:23 **12.Qc1** 5 The exchange on d6 would just repair Black's structure, so the queen has to look for other horisons. **12...Bg4!?N** 7:43

[It seems that Black can actually ignore White's plan by continuing his own regrouping: 12...Ng6 13.Qe3 Kb8 14.Rad1 Qe7 15.Rd2 Ne5 16.b3 Bc8= Radjabov,T (2751)-Adams,M (2729) Baku 2008 (½-½, 39)]

13.Nf4 1:06

[13.f3 Qc5+ 14.Kh1 Be6 would prevent White's intended regrouping radically.]

[I am slightly puzzled by the engines'

suggestion against the consequent 13.Qe3 , namely Bxe2 True, Black solves all his problems of coordination, but isn't the bishop's higher mobility supposed to compensate for the minor structural defect?! 14.Qxe2 Ng6 15.Rfd1 *(15.Rad1 Qb4* takes advantage of the missing e2-knight, by making b2-b3 impossible.*)* 15...Qc5 16.Rxd8+ Rxd8 17.Rd1 Rd6 We can notice that Black has got some other form of compensating dynamically for the double pawns. There is only one open file and Black keeps it firmly under control, as the exchange on d6 would immediately solve all his long term problems after ...cxd6. Besides, the black knight is more mobile than White's, which is restricted precisely by one of the double pawns and by White's main candidate to promotion, the e4-pawn! 18.g3 Ne5 19.Kg2 g5!?=]

13...Ng6 4:24 **14.Nd3** 5:07

[Once again, the exchange of one minor piece is supposed to help White, but here, too, the d-file is the main issue: 14.Nxg6 hxg6 15.h3 Be6 *(15...Bxh3* looks a bit premature: *16.Rd1 Qe5 17.Rxd8+ Kxd8 18.gxh3 Rxh3 19.Ne2±* due to the intremediate checks ♕d2, ♕d1 or sometimes ♕g5, White is going to win an important tempo for approaching with his queen, making Black's compensation for the piece only partial. *)* 16.Qe3 Qd4 17.Qxd4 Rxd4 18.Rad1 c5! 19.f3 Rhd8=]

9.d3 Nc6

[It was well worth considering 9...g6!? , avoiding the unpleasant pin along a4-e8 diagonal. For instance, 10.h4 h6 11.Be3 Bg7 12.Bxe6 Bxe6 13.Bxc5 Nc6 14.Be3 Bg4 15.Qd2 Qd7 L'Ami,E - Salem,A Douglas 2016, Black had decent compensation for the pawn.]

10.h4 g6?!N This innovation was hardly a part of Maxime's home preparation. In fact, Black's position is just poor now.

[10...Ned4 is what Peter faced 4 years ago, and managed to claim superiority for White: 11.Nb5 Nxb5 (A better try was *11...e6 12.Nbxd4*

cxd4 Zhigalko,A - Baron,T Vandoeuvre 2016, though even then White's chances are preferable.*)* 12.Bxb5 Qb6 13.Ba4 Bd7 14.Be3 e6 15.b4↑ Svidler,P - Nepomniachtchi, I Kazan 2014]

[The best way of handling the position might be 10...h5!? this was seen only in one of Peter's encounter. In that game Black managed to solve the problems after 11.Ng5 g6 12.Nxe6 Bxe6 13.Bxe6 fxe6 14.Ne2 Qd6 15.Bf4 e5 16.Bg5 Bh6∓ Jakovenko, D - Svidler,P Rhodes 2013]

11.h5 Bg7 12.Be3 Ned4 13.h6?! This impulsive decision makes Black's play much easier, since his king can be hidden on the kingside now.

[Much stronger would be 13.Rc1! keeping Black under serious pressure

13...Bf6 14.Nd5 This was certainly the point of Peter's previous move, but exchanging the dark-squared bishops isn't a big achievement for White here.

[After 16.Bd5 0-0 17.Bxc6 Nxc6 18.Bxc5 Re8 Black's compensation for the pawn is undenieble.]

16...Nxd4 17.Qa4+ This way White manages to avoid the pin of his ♘f3.

17...Qd7?! Maxime returns the favour - White, who suffers from a lack of harmony would benefit from exchanging the queens.

This is a prime effort by Peter Svidler. His opening setup is proven to be very effective after the slightly surprising break on the ♔-side. In general keeping pieces on the board benefits the player with more space. In this postition White has more room for his pieces due to his forward post on d5. But on the other hand the white-squared ♗ is Black's good ♗. For a similar discussion see the games Topalov,V - Jussupow,A/Novgorod/1995/CBM48 and Tischbierek,R - Sale,S/Budapest/1996/CBM56.

[20.gxf4 In all games Anand took on f4 with a complicated position, which

would most likely end up into a difficult to asses endgame. 12...Nf6 13.Bd4!? As we shall see, this is another bold move in the tussle for the initiative. The time-gaining aspect is clear - this piece needed to up and leave the back-rank, but it also virtually commits it to exchange. White had to forsee a good deal of what is to come. Putting his knight on d6 would be a big mistake if it turns out it can be straightforwardly undermined there.

16...f5 17.0-0! Again critical.

[17.Rb1 Bc3+ 18.Kf1 Bd5 and it looks as if the initiative is well on the way to changing hands]

17...Bxf3! Not just praiseworthy for rightly resisting the material, but emphasising again the reason why 17... Bxa1 would be so wrong, namely the central importance of the dark squares. For obvious reasons, the exchange of bishop for knight in general increases influence over that set of squares which is the opposite of the exchanged bishop's domain. The knight on f3 was in particular a heroic guardian of white's dark squares. **18.Rxf3 Nc6!**

[18...Bxa1 Finkel,A 19.Qxa1 Nc6 20.a3 Rfd8 21.c4±]

19.a3! a5! Perhaps the best move of all. Material has long since been passed up (note that aside from the positional objections any ...Bxa1 would involve serious danger to black's king too.) However, the persistency with which white bolsters his pawn chain, and black attacks it shows two players confident in their understanding of the battleground for the initiative. **20.Nxb5**

interesting one that I used to play for a while. **15.Rxe8+ Qxe8 16.Nd2 Qe1+ 17.Nf1 Bg6 18.g3** The best move is what Kotronias played against me and that is probably critical for the assesment of the line.

18...b4! 19.h4 I am not really sure if this is a planned improvement or simply Ivanchuk was caught again in a Marshall like previously against So in Wijk 2015.

[In a famous match played by SMS messages I was together in a team with French GM Nataf and GM Radjabov on the black side and this line was introduced then. 19.Bxd5 cxd5 20.Qxd5 Rd8 21.Bg5 Qxa1 22.Bxd8 Bf8 23.Ba5 Qb1 24.Kg2 Bxd3 25.Nd2 Qc2 26.Qa8 Qxd2 27.Bxb4 h5 28.Qxf8+ Kh7 29.Qxf7 Qe2 30.Qf4 Qf1+ 31.Kf3 Qe2+ 32.Kg2 Qf1+ 33.Kf3 Qe2+ 34.Kg2 Qf1+ ½-½ (34) Ojjeh team-Nataf team Paris 2003. [Two other possible move orders are 3.Nc3 Nc6 *(*and *3...d5 4.cxd5 Nxd5 5.g3 Nc6 6.Bg2 Nc7)* 4.g3 d5 5.cxd5 Nxd5]

3...Nc6 4.Bg2 d5 5.cxd5 Nxd5 6.Nc3 Nc7 7.a3 g6 This is the approved answer against White's variation. Black anticipates the latent threat b2-b4 and does not expose his e-pawn.

[But actually the refutation of 7...e5 (which, by the way is statistically more popular) is far from clear. 8.b4 cxb4 *(8...f6 9.b5±; 8...a6 9.0-0* leads to a position which could arise via 7.0-0 e5 8.a3 a6, but the last move is anything but critical in that line.*)* 9.axb4 a6∞ Since White seems to have discovered new ideas in the line played in this game, Black may start reconsidering 7...e5.]

8.d3 Bg7 9.Be3 Ne6 10.h4 There will be moments when the insertion of this move and Black's reply will favour White.

10...h6 11.0-0 Bd7 A typical move in such lines, over protecting the c6-knight in order to meet the attack against c5 with ...b7-b6.

12.Ne4 b6 13.b4!? The idea behind 10. h4 becomes clear: in order to make the queenside sacrifice effective it is useful to weaken the kingside a bit. **13...cxb4**

[13...Bxa1 14.Qxa1 f6 15.bxc5 bxc5 16.Bxc5⩲ White has a pawn for the exchange, active play and the more compact structure.]

The game was played in the penultimate round. While Svidler had to win to retain some theoretical chances for the title, Polgar had a bad tournament and brought up the rear. **1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0** Let's make the first stop for some statistics. This position was rather popular in San Luis with not less than nine games played. All the players

excluding Morozevich had it on the board while Svidler played it not less than 5(!) times, 4 of them with the black pieces. **8.c3** The brave lady accepts the challenge. Nowadays most of the players are trying to avoid the sharp and well-explored variation of Marshall. This tournament hasn't become an exception and only two more games featured the Marshall.

[White deviated from 8.c3 six times, three times with each 8.h3 3 scoring 2.5 out of]

16...Rae8 17.Ne4 Bg4 18.Qg2 Qxg2+! A precise move demonstrated earlier this year by Levon Aronian. Black needs the white king on g2 in order to have a check on f3 after the exchange on e4.

[Now 20.Bd2? would be a blunder in view of fxe4 21.dxe4 Bf3+! That's why 18...Qxg2 was played!]

20...Bxf4 21.gxf4 fxe4 22.dxe4 Bf3+! Coping Aronian's play in the above-mentioned game. **23.Kxf3 Rxf4+ 24.Kg3 Rfxe4 25.Rxe4 Rxe4 26.f3 Re5** Only now Svidler deviates from Aronian's Re2. Probably he considered the position which arose in Nakamura-Aronian as dangerous for Black. **27.c4!** The only try to play for a win. This way White succeeds to destroy Black's pawn structure on the queenside.

[27.a4 Kf8 28.axb5 axb5 29.Ra6 *(*or *29.h4 Ke7)* 29...c5 with equality in both cases.]

27...bxc4 The knight can't move in view of a discovered check. **28.Bxc4 a5 29.Rc1!** I believe Judit is still in her home preparation. White wants to exploit weakness of the c6-pawn by means of Bb3. **29...Kf8!** Unpinning the knight. **30.Bxd5** Probably too tired of the tournament Judit forces a draw.

[30.Bb3 Ne7]

[If White wanted to set some problems she had to try to cover the g5-square and take her h-pawn away from the second rank with 30.h4! though even in this case White chances for a win are not big.]

30...Rg5+!? An interesting intermediate move, which forces White to leave the h-pawn unprotected.

[I believe there was also nothing wrong with 30...cxd5 31.Rc5 a4 32.Kf2 Rh5 33.Kg3 Re5=

with an obvious draw.]

31.Kf4

[Certainly the passive 31.Kf2 Rxd5 32.Ke1 Rh5 is fine for Black.]

31...Rxd5 32.Rxc6 Rd2 33.Ra6 Rxh2 The point of the intermedite check on the 30th move. **34.Rxa5 Rxb2=** Now it's a dead draw. **35.a4 Kf7 36.Kf5 g6+ 37.Ke5** With the positional threat of Ra7+. So **37...Re2+ 38.Kf4 h5 39.Ra7+** The game leaves the question where to look for an advantage in the 12. d3-line open.

11.Nc3 This is a very natural line if White doesn't want to take risks (which is obvoiusly the case here). He will play d4 and get some plus, which is not easy to realize, but almost impossible to lose.

[More complicated is 11.Nbd2 For example, same opponents played here: Rae8 12.c3 d5 13.Ba2 dxe4 14.dxe4 Nh5 15.Nb3 Qxd1 16.Rxd1 Nf6 17.Re1= ½-½ Topalov,V (2700)-Svidler,P (2713)/Linares 1999/CBM 070 (35)]

11...Nd8 Instead of moving the knight to a5, Black is looking for a better place for it, but it costs him - White gets an important tempo - he has no need to withdraw the Bishop to a2 - and he makes use of it.

[Gershon,Alik]

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 Svidler invites his opponent to try the Marshall Attack, but lately heroes to stand up to accept the challenge are quite hard to find. **8.h3** This move is an entrance into the so called "Anti Marshall systems". The general idea here is to postpone the c3 and d4 advances, and finish the development meanwhile. Actually, there are different ways for Anti Marshal, in this game we will observe one of them. **8...Bb7**

[8...d6 is a transposition into the classical Ruy Lopez after 9.c3]

9.d3 Re8!? An infrequent and yet promising continuation. Black tries to manoeuvre without d6 which allows the e7 bishop to find some more appropriate places to live in (such as b4 or c5).

[More popular is 9...d6]

10.a4

[Kramnik tried here 10.Nc3 against Leko and after Bb4 11.Ng5 Rf8 12.a3 Bxc3 13.bxc3 Na5 14.Ba2 c5 he could have only thought about equalizing. 15.f4 exf4 16.e5 Nd5 17.Bxd5 Qxg5 18.Bxb7

And here the opponents agreed to draw, Kramnik-Leko, 2004.]

[Another, an even more popular approach here is 10.a3]

10...h6 De facto, this is a novelty as nobody played here h6 before. However, in a few moves we will realize that it was just a different move order. The idea here is, in fact, very simple - h6 will be played anyway and Black doesn't want to run with d6, so why not now? **11.Nc3** Leko was hoping to advance d5 in one fling and Svidler deprives him of this option.

[It is very interesting in those schemes to develop the knight via 11.Nbd2 which bring us to a very similar position to those in a classical Ruy Lopez positions.]

11...b4 When Black plays b4 he should be aware of some positional dangers, like White's advance a4-a5 at some point. **12.Nd5 Na5N** This is a real novelty, which looks very logical. a5 is taken away which leaves White with one idea only - settling on d5.

[12...Bc5 was examined, without big success though. 13.a5! Rb8 14.Be3 Bxe3 15.fxe3 Nxd5 16.Bxd5 d6 17.Rf1 ½-½ Grischuk,A (2606)-Tkachiev,V (2657)/New Delhi/Teheran 2000/CBM 080]

13.Ba2 Bc5 14.Bd2! Simple, but powerful - Black is forced now to take on d5 which gives White the hope to isolate the knight on a5. **14...Bxd5 15.Bxd5 Nxd5 16.exd5** Here Balck has to play very carefully, trying to bring the knight back into the game. It looks unbelievable now, but 10 moves from now Black's position will become completely lost. **16...Qf6?** With each move the knight is kept on a5 its chances to see daylight in this game decrease.

[For an answer why 16...d6? is not the most fortunate move, I'd suggest asking the knight on a5, which is pinning all his hopes to this square.]

[Interesting is 16...c6 17.Rxe5 *(17.Nxe5?! Bxf2+ 18.Kxf2 Rxe5 19.Rxe5 Qf6+ 20.Qf3 Qxe5* and only White can have problems here. *)* 17...Rxe5 18.Nxe5 Qf6 19.Nf3 cxd5± *(19...Qxb2? 20.Rb1 Qa3 21.Ne5±)*]

17.c3! bxc3 Another inaccuracy which will be obvious by the next move.

[⌓17...Qb6 18.Be3 *(18.d4?! exd4 19.cxb4 Bxb4 20.Bxb4 Qxb4 21.Qxd4 Qxd4 22.Nxd4 c5!* And Black is OK.*)* 18...Bxe3 19.Rxe3 d6 20.Nh4±]

18.Bxc3± Qb6 19.Rxe5! White is virtually a piece up on the ♔ side, so he tries to open it. **19...Bxf2+ 20.Kh1 d6?** The importance of the 'd6' square has already been mentioned. In addition, this move weakens 'c6'. It's hard to say what Peter missed here, but it seems that he underestimated White's 22nd move.

[20...Nb3 is bad due to 21.a5 Qb5 22.Ra3 Nc5 23.Qe2 and Black is hopeless.]

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 A somewhat surprising choice from Kramnik's second. Peter has never played this move before. Possibly his choice is also based on the fact that St. Petersburg Grandmaster has never won a single tournament game against Sveshnikov Sicilian (according to MEGA 2005 database) and he just wanted to try new type of positions. However, it will turn out that this was an unispired decision. **7...Nxd5 8.exd5 Nb8** The most popular move, traditionally considered the best by the theory. But these days E.Sveshnikov himself considers the alternative 8... ♘e7 to be at least not worse. **9.c4 a6 10.Nc3 Be7 11.Bd3 0-0 12.0-0 f5 13.f3 Bg5 14.Kh1 Nd7 15.b4 a5**

[15...b6 is a reasonable alternative (without taking on c1 first).]

16.a3 axb4 17.Bxg5 Qxg5 18.axb4 Rxa1 19.Qxa1 Qe3 20.Be2 This variation gained some popularity after Leko's win against Krasenkow in 2002. Later black players found ways to achieve the draw in a slightly worse endgame. Kramnik himself played such an endgame in 2003 versus Leko and achieved an easy draw. My impression is that the value of 20. ♗e2 was overestimated, partially because both Leko and Krasenkow considered it to be a very strong move. **20...Nb8** Filippov's continuation is more ambitious than 20...b5.

21.Qb2N This novelty hardly changes anything. White is unable to make

progress on the queenside anyway. Svidler soon reaches a very similar position from Belozerov-Filippov, with an additional possibility to play Nc3-d1 at some point, but as the game proved, that was a very doubtful achievement.

This move is rather unusual, yet it has been seen at top levels now and then. **9...0-0 10.0-0-0** Both Svidler and Lautier had previous experience with this line, Svidler, with white, drawing Gavrikov and Lautier, with black, losing against Shirov. **10...Nd7** The main line is ♘xd4. The text is seldomly played. **11.Bf3** But this move is new, and probably Svidler had home prepared the following endgame transition. 11. g4 is more natural and had occured in the previous games. Ftacnik: 'Svidler comes up with a fresh approach to a well known position, White uses a special method to slow down Black's counterplay.'

[In the Ruy Lopez a2-a4 is a thematic move, activating the queen's rook and weakening the black queenside. Since in this game White will play it a bit earlier than in the main lines, it is worth mentioning that 12.a4 is premature since Black has not committed his f8-rook yet: c5 13.d5 c4 14.Bc2 Nc5 15.Nf1 Qc7 16.Ng3 Rfb8! The most effective regrouping, forcing White to release the queenside tension and give away the control of the a-file. 17.Nf5 Bf8 18.Qe2 Bc8 19.g4 Bd7 20.axb5 axb5 21.Bg5 Ne8 22.Nd2 Ra7 23.Be3 Rba8↑ Polgar,J (2658)-Kasparov,G (2851) Internet KC 2000 (½-½, 49)]
12...Re8 13.a4!?

[After the usual 13.Nf1 Bf8 14.Ng3 g6 15.a4 Black has a choice between two reliable systems: c5 *(The modern trend is 15...Bg7 16.Bd3 c6)* 16.d5 c4]

13...Bf8

[13...c5 would have probably transposed to one of the main lines mentioned above, but maybe Svidler intended to play the modern one, based on refraining from ...c7-c5.]

14.Bd3 c6 15.Qc2!?

[White could, of course, transpose with 15.Nf1 as for instance in a game played in the same tournament: Qc7 16.Ng3 g6 17.Bg5 Bg7 18.Qd2 Nf8 19.Bh6 Ne6 20.Bxg7 Kxg7 21.Bf1 Rad8 22.b4 Nd7 Dominguez Perez,L (2732)-Adams,M (2742) Baku 2015 (½-½, 38). But Karjakin wants to make full use of the concrete move order, keeping his knight close to the queenside.]

15...Rc8

[In a somewhat older game, one of the main specialists of the ...c7-c6 system with Black kept regrouping as in the main line: 15...g6 16.b4 Nb6 17.a5?! Stabilising Black's queenside. *(*It is true, though, that *17.axb5 axb5 18.Rxa8 Bxa8 19.dxe5 dxe5 20.Nb3* offers White only some temporary control as after *Qc7 21.Be3 Nbd7* it would be hard to stop the equalising ...c6-c5 for too long.*)* 17...Nbd7 18.Bb2 Rc8 19.c4 exd4 20.Bxd4 bxc4 21.Qxc4 c5∓ Berg,E (2623)-Sasikiran,K (2694) Dresden 2008 (0-1, 63)]

16.axb5 axb5 17.b4 c5!?N A surgical novelty.

[But the slow treatment of the position is entirely viable as in the following classical game: 17...g6 18.Bb2 Nh5 19.g3 exd4 20.cxd4 d5 21.Bc3 Nb6 22.e5 Rc7 23.Nb3 Bc8 24.Kg2 Ng7 25.Nh2 h5 26.Nc5 Nc4 27.Nf3 Bf5 Short,N (2635)-Portisch,L (2605) Wijk aan Zee 1990 (½-½, 56), with a harmonious position for Black.]

18.bxc5 exd4

[18...dxc5 would offer White a dangerous initiative based on activating his Spanish bishop: 19.Bxb5 cxd4 20.Bc4 dxc3 21.Qxc3 Qc7 *(21...Re7 22.Ba3 Nc5 23.Rab1↑)* 22.Bxf7+! 19.c6

[White has not developed enough to build up a massive centre: 19.cxd4 dxc5 20.d5 c4 21.Bf1 Bc5↑]

19...dxc3 This is the simplest solution, but it allows White to retain some symbolic advantage.

[19...Bxc6!? is more ambitious but not easy at all to calculate: 20.Nxd4 b4 21.Ba6 *(21.cxb4 Bb5 22.Qb3 Bxd3 23.Qxd3 d5⇄; 21.Nxc6 Rxc6 22.Bb2 bxc3 23.Bxc3 Qc7∓)* 21...bxc3! *(21...Rc7 22.cxb4)* 22.Bxc8 cxd2 23.Bxd2 Bxe4 24.Bxd7 Bxc2 25.Bxe8 Be4=]

20.cxb7 cxd2 21.Qxd2 Rb8 22.Bxb5 Qb6 A viable move, even though it will eventually lose a tempo.

[22...Rxb7 23.Bc6 offers White some initiative.]

[But 22...Qc7!? may be a slight improvement over the game.]

23.Rb1 Qxb7 24.Bd3 Qa8 25.Rxb8 Rxb8 26.Bb2 ±/= White has the bishop pair, more space and the better structure. But in view of the reduced number of pawns, his chances to prove anything concrete are very slim. **26...Qa2 27.Re2 h6 28.Qc1 Qb3 29.Bc4 Qb7 30.Qd1**

[Since White intended to play e4-e5 it would have made sense to keep the bishop pair in the process, but unfortunately 30.e5 dxe5 31.Nxe5 Nxe5 32.Bxe5 allows the queen exchange with an obvious draw: Qb1]

30...Re8 31.Bxf6 Betting on an illusory attack.

[31.e5 dxe5 32.Nxe5 Nxe5 33.Bxe5 is not too promising either, but White would at least keep some symbolic pressure.]

31...Nxf6 32.e5 dxe5 33.Nxe5 Re7 34.Qd4 Nd7 Those thinking the game would not last for too long were right, but they surely failed to guess the result as a draw looks inevitable already. **35.Nxf7** This does not spoil anything yet, as after general exchanges on f7 the reduced material would not offer Black any winning chances. In fact, the f7/f2 square theme will be recurrent in this match.

[But a more restrictive move order was 35.Rb2 Qc7 36.Nxf7 Rxf7 when Karjakin's manoeuvre 37.Rb5 is entirely playable, but not really effective after, say, Bc5]

35...Rxf7 36.Rb2 Qc6 Occupying the square on offer. **37.Rb5??** Bringing the last reserves into the attack is not too threatening, as ♖f5 can always be met with ...♘f6.

[Karjakin's blunder was probably intended as an improvement over 37.Rb3 which allows (among many other playable moves) Ne5]

37...Kh8! As simple as that. The white rook is hanging, meaning Black keeps his extra piece. **38.Rd5?!** Shortening the agony. **38...Nb6** Confronted with new material losses, Karjakin resigned. With hindsight, Karjakin's blunder can be regarded as a non-intentional psychological gambit. Had the game ended in a draw, Svidler might have kept his composure and his minimal advantage on the score table, but facing the perspective to win easier than expected he took a few highly uninspired decisions.

13...exd5 14.Na4 Re8 15.a3 a5 16.Qc2 Bf8 A typical plan in this structure (often arising from the Grünfeld Defence with 4. ♘f3 and 5. ♗g5): Black transfers his bishop to d6, where it controls the b4-square and aims at White's kingside. **17.Nd2?!**

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 b5 6.Bb3 Bc5 Svidler is one of the experts in the Arkhangelsk Variation of the Ruy Lopez. **7.c3 d6 8.a4** This is the second most popular move in the position.
[The most frequently played move is 8.d4 Bb6 9.h3 *(9.a4 Rb8* transposes to the game.*)* 9...0-0 10.Re1 and so on.]
8...Rb8 9.d4 Bb6 10.axb5 axb5 11.Na3 0-0 12.Nxb5 Bg4 Black gives up the b5-pawn to set up this irritating pin as well as pressure on the d4-pawn.
13.d5
[13.Bc2 Bxf3 14.gxf3 Nh5 15.f4 Nxf4 16.Bxf4 exf4 17.Qg4 is the main line with pretty good results for White.]
13...Ne7 14.Bc2 Qd7 15.c4 Ng6 16.h3 Bxh3!? One could say this is a brave move but on the other hand if you look at it closely, it is practically forced. The most interesting thing to note here is that this same sacrifice had been played nine years ago against Karjakin by Radjabov when the Ukrainian GM was just 16 years old with a rating of 2672!
[16...Bh5 17.Qd3± followed by ♗d2 gives Black absolutely no compensation for the pawn.]
[16...Bxf3 17.Qxf3± is also clearly better for White.]
17.gxh3 Qxh3 All these moves were made quickly by Svidler which means he was still in his preparation. **18.Ng5!**

The only defensive move available to White. Considering all the trainspositions we have now reached a position that has been played nine times according to the Mega database.

[18.Ra3? looks logical but after Ng4 The knight cannot move from f3 due to the mate threat on h2 and the other knight is coming soon to h4. 19.Bg5 Qg3+ 20.Kh1 Bxf2 A deadly check is coming up on h3. 21.Qe2 *(21.Rxf2 Nxf2#)* 21...Qh3+ 22.Nh2 Qxh2#]

21.Bxf4 exf4 22.Nf3 Qg4+ 23.Kh1 Rfe8! A very strong move by Svidler bringing a new piece into the game.

24.Ra3 This was played after 18 minutes of thought. The rook stands well on a3 and will help in the defence.

[24.Nh2 Qh4 25.Qf3 *(25.f3 Nh5-+)* 25...Re5! 26.Rg1 Bxf2 27.Rg2 Bg3 28.Nd4 g6 stopping ♘f5 and preparing ♖h5. 29.Ne2 Rg5∓]

24...Nxe4 25.Bxe4 Rxe4 26.Rc3 Ba5?! Moving the bishop away from the b6-square was a mistake as we shall see in the game. It is well placed on the a7-g1 diagonal and on the new one (a5-e1) it does nothing much.

[The right way to continue would be 26...Qh5+ 27.Nh2 *(27.Kg2 Qg4+ 28.Kh1 Qh5+=)* 27...Qxd1 28.Rxd1 Re2! Black has two pawns for a piece and now wins the third one. 29.b4 Bxf2= ±.Black should have excellent chances to hold this position.]

29.Nd4 This move would not have been possible had the bishop been on b6.

[A tricky attempt would have been 31...f3!? 32.Nxf3 *(32.Nxa5 Rh4-+* with the threat of ♖xh2 and ♕h4 gives Black a winning position.*; 32.Qxf3 Rf4 33.Qd3 Bb6 34.Qc3 Qh4∞* When things are not at all clear.*)* 32...Bb6 Black is still in the game.]

32.b4! f3 33.Qxf3 Rf4 34.Qc3 The threat of c4-c5 forces Black to exchange the queens. **34...Qxc3**

[34...Qh4 35.c5+-]

35.Rxc3 Bxf2 36.Rf3 Rxf3 37.Nxf3 Black has only two pawns for a piece and is facing a strong pawn majority on the queenside. It should not be too difficult for Karjakin to convert this.

37...Re2 38.Ng5 f6?

39.Ne6 Now it's all over. **39...h4 40.Nxc7 Bg3 41.Ne6 Rc2 42.b5** The pawns cannot be stopped, hence Peter resigned. A very interesting practical sacrifice by Svidler which was defended excellently by Karjakin.

1.Nf3 Nf6 2.g3 d5 3.Bg2 e6 4.0-0 Be7 5.d3 0-0 6.Nbd2 c5 7.e4 Nc6 8.Re1 We have the main position of the King's Indian Attack where Black has two main options here. One is to go for instant queenside expansion with 8...b5 and the other is what was played in the game. **8...Qc7 9.Qe2**
[9.e5 is the main line and the continuation would be something like Nd7 10.Qe2 b5 11.Nf1 a5 12.h4 Ba6 13.Bf4 b4 14.Ne3 Nb6 15.Ng4 You can see how clear battle-lines have been drawn with White attacking on the kingside while Black is expanding on the queenside. It's a very exciting position which one must study in order to improve one's attacking and defensive abilities.]
9...b5 10.exd5 Though the great majority of players have pushed ahead with e4-e5, Svidler goes for the exchange of pawns. It shouldn't really give him any hopes of an advantage but I guess more than an edge he was looking for an original position. **10...exd5 11.a4 bxa4** Unconventional but not at all bad.
[11...b4 would be a normal choice. 12.Nb3 Re8 13.Bf4 Qb6 with an interesting position.]
12.Rxa4 Re8 13.Qd1 h6 14.Nb3 Be6
[14...Qb6 15.Bf4 Bd7 is a much more subtle way to play. As in the game, the bishop on e6 is not so well placed and allows White to get a solid edge. 16.Ra1 a5∓]
15.Bf4 Qb6 16.Ne5!± Nxe5 17.Bxe5 The defects of Black's position start becoming apparent. All his pawns are being attacked by White. For example,. the knight on b3 attacks c5, the bishop on g2 keeps an eye on d5 and the rook on a4 pressurises the a7-pawn. All in all it is not so easy to play this position for Black. **17...Nd7**
[17...a5 18.Qa1±]

32.Rb7! Exchanging a pair of rooks weakens the a6 pawn. **32...Rxb7 33.Qxb7 Qxb7**

[33...Rc7 34.Qb6 Qe5± was much better than the game. After the exchange of queens it is much easier for White.]

34.Bxb7 Bd7 35.Bxa6 Bxh3 36.Ra4 Re5 37.Bxc4+- With two connected passers it should not be too difficult for Svidler to win. **37...Re1+ 38.Kh2 Bf1 39.Nf3 Rc1 40.Bxf7 Rc2?** A bad mistake which abruptly brings the game to an end.
